

## ASSURANCE OF NEW DEAL A BRINGS JOY TO CHINESE

**Equal Treaty Prospects Expected to be Factor for Restoration of National Tranquillity**

SHANGHAI, Jan. 30. (Exclusive)—That the whole foreign special position on China collapsed like a house of cards is the impression created generally by the announcement by Sir Austen Chamberlain, the British Foreign Secretary, that the British are prepared to go the whole road in relinquishment of special privileges and are ready to negotiate equal treaties with China.

Local Britons, who thought the troop movements were for the purpose of re-establishing the old rights, are completely flabbergasted by the official announcement, but are particularly incensed that America beat Great Britain to it in the announcement of a new China deal.

The Japanese press reports received locally also emphasize the significance of the arrangement, asserting that Japan and America are responsible owing to their refusal to participate in the international movement to decimate Japan's desire to relinquish its special position, but convincing considerable uneasiness respecting the granting of a tariff autonomy, which would be a serious blow in a country known trade, especially in cotton goods.

**OUTSTANDING SENTENCE**

C. T. Wang, the local Kuomintang leader, discarding Secretary Frank B. Kellogg's note, declared that most of the document contained familiar language, but one sentence brought joy to Chinese hearts. That sentence was drawn up by the American Chamber of Commerce and suggests improvements easily within the power of the government, which would make it more attractive for the Americans to continue business operations.

**ORDER OUT OF CHAOS  
DECLARED STRIFE AIM**

BY F. K. WU

(Continued from Page 1)

HONGKONG, Jan. 30. (Exclusive)—The present strife in China arises as a determined effort to put her house in order and to regain her lost prestige.

"The political party which claims to have started this movement is the Kuomintang of which the late Dr. Sun Yat-Sen was the founder.

The Chinese leaders of the Nationalist party. After it had strengthened its foothold on two provinces in the south, the administrative organ assumed the name "Nationalist government" and has since become the power over more than a third of China.

The Nationalists are called Cantonese because many of the leaders are Cantonese and began their activity in Canton.

The political party which claims to have started this movement is the Kuomintang of which the late Dr. Sun Yat-Sen was the founder.

The charges that they are Reds and that their avowed object is to establish a supervisory board. In addition to these another body known as the Kuomintang committee.

"The revolution of 1911 which changed China into a pseudo-republic was formed by the Kuomintang.

The cause for the overthrow of the Manchu dynasty finds explanation in the fact that its rulers were oppressive toward the people and powerless toward the outside world.

**DISSENT IN THE FAITH**

A series of diplomatic failures resulting in the imposition of "unequal treaties" on China, gave ground for nation-wide dissatisfaction that its rulers were oppressive toward the people and powerless toward the outside world.

**RED'S CRY RALLY FOR NICARAGUA**

(Continued from First Page)

Mr. Kellogg's attempts to distract attention from the real motive of American intervention in Central America, namely ratification of the American oil magnates and bankers of the United States in Central America, the proclamation continues.

"American imperialism is becoming bolder and cruder in trying to colonize the whole of Latin America, and we must oppose it in the interests of American exploiters."

Declaring that the United States must subdue the entire country in order to accomplish its design to dominate Central America, the proclamation says:

"That is why the mass has been thrown away and the country condemned to the pestilence of protecting the lives and property of American citizens."

Accusing the American policy of seeking domination in Panama and in Central America, the Tico-Arca controversy, the manifesto proceeds:

"The League of Nations by its silence has again betrayed the people of the smaller countries to the imperialists."

Appealing to the proletariat of the world to rally in support of the people of Latin America in order to save themselves from exploitation, the manifesto demands: "Let us in the name of our brothers in Nicaragua the population must organize a powerful movement against the exploitation and oppression of the United States."

The executive of the McNair-Hanau bill which is on both House and Senate calendars.

**CONCESSION TERMS**

NEW YORK, Jan. 30. (P)—The United States is "hell-bent" upon the meanness kind of imperialistic policy," according to Senator George W. Norris, Democrat of Nebraska, who spoke here today at a meeting under auspices of the nonintervention committee.

"What hypocrisy you show—per what cowards you are—in the fact of your pretensions and the pretensions of your statesmen when you tell your people that you are better paid and fed. They are subject to severe military training. A propaganda corps whose duty is to spread the counter part of every regiment, and the Cantonese soldiers are inculcated with the idea that they are the saviors of the country, so they must not mind death in attacking the enemy."

**SUN'S ENDEAVORS**

In the face of overwhelming odds, Sun Yat-Sen has been able to afford himself a respite in Canton for a period of ten days in order to facilitate the new year financial settlement which begins Monday.

François Tsia, a local Chinese editor, was kidnapped within the international settlement Saturday and still is being held in close confinement despite the efforts of friends to obtain his release.

Gen. Li Pao-Chen, defense commissar, informed foreign correspondents this afternoon that the authorities of the international settlement had given him authority to kidnap Tsia, which statement was hotly denied by Milton Johnson, local commissioner general. Gen. Li promised to release Tsia as soon as there was no danger of execution, but it was necessary to hold the editor prisoner owing to his pronationalist activities.

**TWO BATTALIONS OF INDIA TROOPS EMBARK**

CALCUTTA, Jan. 30. (Exclusive)—Two battalions of Indian troops embarked for China today.

**AMITY NOTE BY HANKOW AMERICANS**

HANKOW, Jan. 30. (P)—A note designed to create a better understanding between American business men here and the Nationalist government is to be handed to Foreign Minister

of China.

## REFUGEES REACH COAST

**Three Americans Arrive at Seattle From China and Describe Experience With Mobs**

SEATTLE (Wash.) Jan. 30. (P)—Refugees who arrived here today on the liner President Grant told how a providential rain ended the rioting and pillaging at Hankow, where the British concession was seized recently in a bare-up of Chinese Nationalists.

During the three days they were kept virtual prisoners by the rioting of the native mob, the Manns subsisted on food which they had stored in their apartment in the building, having anticipated that they would be marooned there.

**DESCRIBES ATTACK**

Mrs. Manns gave a graphic account of the Chinese attack on the foreign concession. She is an American with her son to escape of relatives in Knoxville, Tenn., where she plans to stay until China's internal dimension abated.

"The mob was in cession," she related. "They filled the Bund, the water-front street in Hankow, as far as we could see. Imprisoned as we were, we could look out upon the heads of the mob, and it was not a pretty sight. Most of the rioters carried no weapons except long bamboo pikes on which they fastened their foot. It is odd to

our anxiety was the news that two Germans had been killed by the rioting of the native mob; the Manns subsisted on food which they had stored in their apartment in the building, having anticipated that they would be marooned there.

**AMERICANS DEPART**

"A rainstorm let the streets clear and we were able to come out of the house and walk about. Many Americans fled hurriedly from Hankow to more peaceful Chinese cities when only a small number of the foreigners left.

"Mrs. Manns' husband, Mr. John Nichols, the third refugee, related.

She had been in Hankow several years with her husband, an American oil company employee, and had stayed at night in a hotel and in a Chinese inn.

"When the rioting started, she

intended to visit with her mother in Astoria, Or., until the civil war was

somes of its fury.

**NECESSITY FOR FORCE**

The only way to unify the country is force, the Northern generals turned a deaf ear to all other arguments for reforms and improvements.

However, the first step has been to consolidate the civil or political power of the North.

All civil matters rest in the hands of the commanding general. All civil matters rest in the hands of the commanding general.

The charges that they are Reds and that their avowed object is to establish a supervisory board. In addition to these another body known as the Kuomintang committee.

the board of temperance, prohibition and public morals of the Methodist Episcopal Church and soon will be introduced in both Houses of Congress. Rev. Clinton True Wilson, executive secretary of the board, said here tonight in an address at the First Methodist Episcopal Church.

The bills, as outlined by Dr. Wilson, provide:

A general all sentence for all persons, including first offenders,

and a general guilty of prohibition law violation.

The mandatory deportation of all aliens convicted under the prohibition

laws is to be continued.

Imposition upon persons found guilty of buying intoxicating liquor of the same penalty now dealt to sellers of such beverages.

Mr. Wilson told his audience that both the Senate and the House were overwhelmed by the amount of legislation introduced.

"We are overwhelmed by the amount of legislation introduced," he said.

He advised the board that all of the board's measures would be enacted.

**COALITION URGED ON RELIEF BILLS**

WASHINGTON, Jan. 30. (P)—A coalition of relief, reconstruction and tax reduction advocates to force both proposals through Congress was suggested tonight by Representative Dudley, Democrat of Ohio.

Rep. Dudley, in a letter to Chairman H. C. Bowen of the House Agriculture Committee and Representative Garner of Texas, urged that the two bills be introduced in the House as a unit.

"The two bills are so closely related that it is difficult to pass either alone," he said.

Rep. Dudley said that the two bills

### NEWS CAMERA MAN DICTATOR

Orders Obeyed by Royalty and Presidents

Prince of Wales Popular With Photographers

Coolidge Found "Fairly Good" at Posing

NEW YORK, Jan. 30. (AP)—When news is in the making the camera man is king, with royalty and presidents, and statesmen usually obedient to his entreaty.

Reporters ask questions, but most photographers give orders. When the Prince of Wales was here a camera man directed him to "look up at the Wolverton Tower and look amazed." The Prince looked up with amazement written on his face. This must-traveled young English bachelor has won popularity with photographers all over the world. When he stood at salute, despite the tiring pose, long enough for a large group of photographers to get pictures of him at a French magazine recently.

The camera man classifies public men photographically rather than politically. President Wilson was considered a poor subject, and Coolidge an easygoing one. "Fairy god" as he is camera conscious, an expert in posing, got an excellent photograph of these two together during a trip of Mr. and Mrs. Wilson to Europe.

"Uncle Joe" Cannon sometimes used to hide behind a smoke screen from his famous cigar. Chief Justice Taft, however, President Harding suggested that they pose, and Dawes acquiesced. Since then he has even baited his flies before the camera for a youngster's benefit.

Photographers run hundreds of literal risks to their necks. A score of cameras were smashed in strike riots at Passaic, N. J., last fall. The reporter who made his way up climbing the skeleton frame work of an unfinished skyscraper for just the right picture.

When the bather dropped at Miami, last September, Ralph Earle, a Pathé News photographer, sent for more film instead of seeking safety. He took storm pictures, which he brought to New York by rail and airplane, and then had to go to a hospital.

Photographers run hundreds of literal risks to their necks. A score of cameras were smashed in strike riots at Passaic, N. J., last fall. The reporter who made his way up climbing the skeleton frame work of an unfinished skyscraper for just the right picture.

The original discovery of the substance by Dr. Leob some time previous to 1909 was influenced somewhat by chance. In trying to find a suitable catalyst agent which stimulates the development of eggs from the life cell, Dr. Leob happened to try a blood serum and, using the eggs of the sea urchin, he met with success.

Since that time the work has been continued by Dr. T. E. Clark, son, formerly head of the department of biochemistry and now at the University of Adelaide, Australia, and Dr. Clark and Dr. Sharp. They finally succeeded in isolating from the blood the substance which they called oocytin.

And since that time efforts have been made to purify and analyze the composition.

Experiments have shown, Dr. Clark states, that oocytin is present in the highest concentration in the blood of a large number of animals, although the highest percentage seems to be found in the sea urchin. Artificial parthenogenesis has been tried and found in great numbers along the Pacific Coast. To achieve results they must be gathered during the months of June and July, when it is known that the eggs will be sufficiently developed. The eggs are removed from the animals and placed in a beaker or bowl and a small amount of oocytin is added. After a few minutes the formation of membranes around the eggs takes place in from twenty minutes to several hours, depending on the concentration and type of oocytin used.

Dr. Clark says "The process has been tried successfully on other organisms than the sea urchin, however we are not interested in producing synthetic animals at all, but are developing a series of experiments exactly what the substance is. Now that it is known that oocytin will produce the desired results in the case of the sea urchin that is all that is needed to go on with the process. Any further experimentation along that line at present would be moribund certainly."

### SAVANTS STUDY STRANGE POWER

Substance Has Capacity for Fertilizing Eggs

Oocytin Extracted From Blood of Animals

Berkeley Scientists Again Attempt Analysis

BERKELEY, Jan. 30. (Exclusive)—Another attempt to analyze chemically is extracted known as oocytin, which is extracted from the blood of various animals and which has the power of fertilizing and producing new individuals from the age of the common sea urchin, has recently been completed by Dr. Guy W. Clark and Dr. Paul W. Sharp of the biochemistry department of the University of California.

Oocytin is a strange substance announced recently for the first time after twenty years of research at the University of California started by the late Dr. Jacques Loeb, nationally known biochemist. One part of the purest preparation of this substance will start the developmental processes in previously unfertilized eggs of the purple sea urchin.

STARTS LIFE PROCESS

As far as is known, the University of California department of biochemistry is the only one in the world that has done any research work on oocytin. The main problem with the problem is the fact that the question has nothing to do with the development of life chemically, but merely acts as a spark or trigger pull to start the life processes into the development of individual animals from the egg.

So far, Dr. Clark reports in a communication to the American Journal of Biochemical Chemistry, nothing can be said as to the chemical composition of the substance except that it contains purine bases and carbohydrates. It appears to be a protein substance, but beyond that there has been no success.

Dr. Clark adds, that these chemically started animals have not lived more than two or three days. There seems to be something lacking in the purity of the oocytin powder, carrying out the fertilization they cause their death after the formation of membrane has well begun and the normal process of development seems to stop.

The original discovery of the substance by Dr. Leob some time previous to 1909 was influenced somewhat by chance. In trying to find a suitable catalyst agent which stimulates the development of eggs from the life cell, Dr. Leob happened to try a blood serum and, using the eggs of the sea urchin, he met with success.

Since that time the work has been continued by Dr. T. E. Clark, son, formerly head of the department of biochemistry and now at the University of Adelaide, Australia, and Dr. Clark and Dr. Sharp. They finally succeeded in isolating from the blood the substance which they called oocytin.

And since that time efforts have been made to purify and analyze the composition.

### Controlled Quality

Every step in the refining of PAN-GAS, from wells to filling stations, is directed toward producing instant vaporization and complete combustion.

Pump samples of PAN-GAS are given the Pan-Vapor test because we want to prove you, as you get it.

No residue on the pan, after a sample of PAN-GAS has been Pan-Vapor tested, shows its complete purity.

what  
"pan-vapored"  
means  
to new design motors.

Practically every 1927 motor is of the high compression type—a small combustion chamber. Carbon is its worst enemy and more quickly fills these smaller interior spaces.

The freedom from carbon-forming solids in PAN-GAS is vital to motors of this type. PAN-GAS keeps a new motor clean during the "breaking in" period so that it can safely give its best in power and performance.

If you would add long service to your car, use PAN-GAS always, because it burns completely. The PAN-VAPOR test is a sure indication of its complete vaporization without residue.

This gasoline guarantees controlled quality, which gives your motor the opportunity to show its full economy and deliver its full rating. The PAN-VAPOR test assures purity and controlled quality whenever you buy PAN-GAS.

it's  
pan-vapored!

## GRANGE'S YANKEES DEFEAT MULLER'S TEAM, 14-0

### FAMOUS RIDER STARS AS MONTEREY TRIUMPHS

Visitors Defeat Locals, 14 to 7 as Tommy Rides Brilliantly to Score Eight Goals

It was Tommy Hitchcock day at the Midwick Country Club today. That incomparable young polo person, the best player in the game today, made his debut in Southern California mallet circles with the Monterey Cardinals in a tilt with the Midwick Purple team before one of the largest and most numerous gatherings that has turned out for the sport in these many years and his brilliant playing completely overshadowed everything and anything else on the field. The visitors playing with a four-goal handicap advantage and with the aid of young Mr. Hitchcock handed the Midwick boys their worst drubbing they have received in years, defeating them by a 14-to-7 score.

**SIGHT FOR TOMMY**  
Tommy scored eight goals himself, which was one more than the entire Midwick team was able to put up during the afternoon. He had been told the Midwick team, playing under a small handicap when they realized they were up against Hitchcock, that caused them to look so poor in the game. The two riders who won't finish him a victory over the Del Norte four, played very mediocre yesterday. They never seemed to catch up to young Hitchcock. It may be that one pointed that when Hitchcock got his brilliance makes everyone in the game look like a fool. Hitchcock, mounted on an Argentinian named George, started by scoring a goal in the first ten minutes record for the Newport Bay course yesterday afternoon. But the 151-class hydroplane, Midge II, furnished a feature which was secondary only to the series of spectacular accidents that put four of the six entries out of the race in the new year sponsored by the Pacific Coast Hydroplane Association.

Speedboat experts have been waiting for the Midge to come through for the past several months and she finally delivered by winning all three heats. In the second heat Midge

### ACTION SHOTS FROM SUNDAY'S SPORT PROGRAM

Top photo shows "Red" Grange off on one of his customary jaunts around somebody's end. In this particular instance, Pete Schafnitz, at the far left, brought Grange down with a thump and "Red" had to leave the game. Rau is seen coming up close to Grange while McArthur is the chap alongside of Grange. Below Grange, the two players shown are the ones that the photographers consequently did not get Grange's sixty-yard gallop. Below Tommy Hitchcock, who scored eight goals for Monterey against Midwick yesterday, is shown. He's one of the greatest poloists in the world and certainly looked it yesterday. Photos by F. M. Litchfield and H. C. Anderson, Times staff photographers.

### MERCURIES DOWN VIKE SOCCERITES

L.A.A.C. Squad Wins Over Norsemen in Tilt Featured by Near-riots

A crowd, estimated at over 3500, watched the L.A.A.C. defeat the Vikings, 3 to 1, at Loyola Field yesterday afternoon. The victory sends the Club into the second round of the League Cup competition.

The game, which was bitterly contested, was marred by lax refereeing and display of poor sportsmanship on the part of several of the Club players. Four times the referee was threatened on several occasions. Bobby Robertson, star forward for the Club was ordered to the showers for an exhibition of malice.

For the greater part of the first half, during which neither the Club nor the Vikings scored, the Norsemen were penned up in their own territory, and Watine was tested, but three times when breakaway shots in them position for shots at goal.

Thompson opened the scoring for the Club fifteen minutes after the kick off, when Fredrickson was pounced upon from behind. Giese. The decision of the referee drew the disapproval of the crowd, but it stood and Thompson put the ball over the line.

The Club's second goal came a few minutes before the half ended, when Downie sent in a terrific drive, which Canda handled, the ball being passed to the Vikings.

With the count 2 to 0, the Club returned to the attack to open the second canto and carried the game to the Vikings. After a period of much midfield play with neither side being able to dominate, Bobby Robertson got possession near the goal on a short pass from Howarth and on a shore pass from Howarth and on a shore pass from Howarth and

### TILDEN, PARTNER DEFEATED BY GORCHAKOFF, CRAIG IN CITY TITLE DOUBLES PLAY

After waltzing through to the final round of the city men's doubles tournament at Griffith Park yesterday afternoon, William T. (Bill) Tilden, ex-men's champion and Dennis Harrington, younger brother, dropped a decision to Nornal Craig and Dan Gorchakoff, California intercollegiate doubles champions, half-miles apart from Hartnell College in three straight sets, 6-4, 6-4, 6-3. The victory gave Gorchakoff and Craig their second doubles championship.

(Continued on Page 2, Column 2)

### POETS AND BRUINS HOLD LEAD

Whittier and Southern Branch continued their undefeated battle for Southern Conference basketball honors Saturday, when both emerged on top in battles with Caltech and Pomona, respectively, for their fifth consecutive victories.

On the Bruins' side, Bruin terrors thumped the Sagehens, 48 to 13, on the Claremont court. "Dashing Jack" Ketchum, electrifying those present with a jangle of tops, 24 of his team's points or nearly half of those scored. Young, center, managed to ring up 13, and the remaining digits were satisfactorily scattered between

### CRUICKSHANK IS WINNER

"Wee Bobby" Takes First Honors in Texas Open Play; Nabholz Second; Mehlhorn Close Up

SAN ANTONIO (Tex.) Jan. 30. (P)—Bobby Cruickshank of Purchase, N. Y., won the Texas open golf championship and a \$1500 cash prize here today with 292 strokes for the seventy-two holes.

Larry Nabholz was second with 295, and Bill Mehlhorn of Los Angeles and Waldo Crowder of Shreveport, La., tied for third and fourth with 296.

Mike Brady of New York City, N. Y., was fifth with 298 and the remainder of the starters finished in the following order: S. W. Hutchinson, Oklahoma City, 299; Doug Armstrong, Washington; L. B. Schmitz, Lima, Ohio, and John Golden, Paterson, N. J., 300; Joe Fairview, N. Y., 301.

Early in the afternoon Tilden and his partner eliminated Johnny Magg, national junior champion, and Bill Laird in a three-set struggle, 1-6, 6-3, 6-4. Doeg featured here with his ace services on Tilden, while the ex-titleholder gave a real exhibition of volleys. Gorchakoff and Craig, however, were unable to dominate, Bobby Robertson got possession near the goal on a shore pass from Howarth and on a shore pass from Howarth and

(Continued on Page 2, Column 2)

### DRAMATIC JUSTICE

Cruickshank's victory was a well-deserved one, "tallied" up by the referee, who was the last to play in the tournament.

Sucksdorf did a bit of enthusiastic playing on his own part for Whittier, caging the canasta for eighteen digits, which would have been enough to beat Caltech single-handed, but the referee was 38 to 17.

Occidental continued its pattern well enough, although the Tigers had a terrible time winning from Redlands, 48 to 38. Everybody on both teams, however, was recklessly abandoned, although Solly Mishkin managed to punch through eleven digits.

(Continued on Page 2, Column 4)

### YOUNG TO EARN \$100,000

CHICAGO, Jan. 30. (P)—George Young, the 17-year-old Toronto boy who swam the Catalina Channel, will make between \$100,000 and \$150,000 as a result of his exploit, William Wrigley, Jr., who promoted the swim,

### BRADSHAW AND WILSON STAR AS VISITORS WIN

"Red" Turns in 60-Yard Gallop; Bruising Battle Results in Many Serious Injuries

BY BRAVEN DYER

In a bitter, bruising battle of brain and brawn, principally brawn, "Red" Grange and his New York Yankees battered their way to a 14-to-0 victory over "Brick" Muller's Los Angeles Buccaneers at Wrigley Field yesterday afternoon. A crowd of 10,000 fans watched the pro gridders go at each other like a flock of bulldogs who hadn't had anything to eat for several weeks.

### Flatiron in Turf Victory

TAJUANA RACE TRACK, Jan. 30.

Taking command at the stretch turn and holding the public favorite, Arno, in the final drive, Flatiron, with Jockey C. Lang up, won the Arcadia #100 handicap today for the Grangers. Arno, who had been beaten by Flatiron by a nose in the last race, Alexander, six furlongs for second money. The six-furlong affair attracted nine fast sprinters, Baron and Conquistador having been scratched. The winner's time was 1:11 2-5.

Tamarind, off first, set the pace

Crack at Laurels

ST HARRY NEWMAN  
NEWPORT (Cal.) Jan. 30.—"I  
got a crack at Gene Tunney,  
but I can't hold him he's so  
fast. I'm gunning for."

Jack Delaney, light-  
weight champion, decided this  
at the Park City gym,  
as he just finished some light  
in preparation for his fight with  
Maloney in the new Garden  
theory.

**ARTER PAIR**

"My ambition is to win two  
championships," added Jack. "Of  
course, you remember that Bob  
Maloney achieved that promise  
in the title ring, and I may be anxious to du-  
plicate his performance."

Maloney, however, is a  
tough customer.

Joe Anderson, manager of  
the Baron of Leiperville, Pa., came back to Los Angeles yesterday. He is  
the manager of Joe Anderson.

Anderson fights Bert Collins at Vernon one

week from tomorrow night.

Places Low in Sweepstakes  
Event; Prater, Stannard Tie for Second

James Caplen shot a praiseworthy  
87-15-75 to take low honors in a  
sweepstakes run on the Parkridge  
Country Club yesterday. John Prater  
and F. L. Stannard tied for second  
low honors, each contributing a  
75. Prater had a 75-11-75, while  
Stannard shot 161-96-75.

One hundred and thirty-five play-  
ers took part in the event, which  
proved to be one of the most popular  
ever staged over the Parkridge  
links.

**HARDY WINNER AT HOLLYWOOD**

O. W. Hardy finished 2<sup>nd</sup> up in a  
match play against par tournament at the Hollywood Country Club  
yesterday. He beat the field by 1 up  
as a result of the near-scandal de-  
cide to get out and try to spring a  
real comeback as players on new teams.  
Cobb was the most  
recently to fall from the  
mainstream and freed from the responsi-  
bility of management and  
spurred by the desire to stage  
one last grand season before  
retiring from the game, will  
likely become the biggest attraction  
on the circuit. The same  
thing, in no small measure, ap-  
plies to Tri Spears.

**HILLCREST CARDS**

PROFESSIONAL EVENT

A professional sweepstakes is  
carded for the Hillcrest Country Club  
today. The field is limited to 100  
players, and will pit host to a number of  
the leading paid-to-play performers of  
the Southland. Four money prizes  
will be added to the usual sweep-  
stakes.

**JACUMBA SPLITS WITH EL SERRENO**

Jacumba and El Serreno divided  
honors in a team match over the  
Jacumba course yesterday, each team  
winning three games. The team of  
Griffith and El Serreno furnished the feature of the day when  
they captured a twenty-one-hole struggle from Pierce and Smithner.

**RANCHO PROVIDES MIXED FOURENSOME**

PROFESSIONAL EVENT

A professional sweepstakes is  
carded for the Rancho La Canada  
Club today. The field is limited to 100  
players, and will pit host to a number of  
the leading paid-to-play performers of  
the Southland. Four money prizes  
will be added to the usual sweep-  
stakes.

**SHELL OILERS COP**

By scoring three runs in the eighth  
inning, the Shell Oil men put the  
game on ice and defeated the Los  
Angeles Giants, 8 to 6 yesterday after-

noon.

**MAYWOOD COPS GAME**

Maywood won a ball game over Pal-  
os Verdes at Maywood yesterday by  
a score of 9 to 1. Score:

BOND ELECTION FOR  
ORANGEMUTH SET

GRANGE MUTH, Jan. 30.—An election to raise \$10,000 for improvements of the Orangemuth school auditorium will be held at the schoolhouse March 8, it is announced today by F. C. Clegg, chairman of the board of directors. The school, which employs four teachers for its eighty-five pupils, has an auditorium planned to seat 500. The stage, which has been made to be small and the level floor makes the auditorium unsuitable for presentation of programs, according to Mr. Clegg. It is planned to move the auditorium over to the school house for Orangemuth will come before the bond issue.

GOVERNOR REFUSES  
TO DELAY EXECUTION

SACRAMENTO, Jan. 30. (AP)—Gov. Young today refused the request of Bishop Frank H. Rice of the Denver Liberal Church to delay the execution of Edward M. Hayes, condemned to death for the killing of a woman in prison Friday for complicity in the murder of a Japanese woman at Penryn in November, 1924. Ray Arnold of Sacramento was hanged at Folsom last Friday for the same crime.

CENTRAL CALIFORNIA

## 'DAILY DOZENS' HELD FETISH

University Expert Says Physical Culture Only Part  
of Health Problem

BERKELEY, Jan. 30. (Exclusive)—The popular notion that good health is a matter of "daily doses" and repeated formulas of the "every day in every way" variety is all wrong, declare Dr. Richard Bolt of the University of California public health department.

Such an idea is a fetish, founded upon error and fostered by physical culture extremists, he says. There are numerous other things necessary to the maintenance of good health.

"Too many people have listened too easily to the findings of those who have lulled into a false sense of security by the doctrine of physical fitness," Dr. Bolt explains. "Such exercise programs are sometimes very dangerous. They do not comprise the whole of what is essential to maintaining good health.

"Infection, for instance, must be carefully avoided. Diet must be intelligently chosen also, and the diet that the public gets does come, it must be properly treated.

"There is an unwarranted assumption

that the emotion results when parents allow their children to read sea literature.

"We know that the problem of the emotion exists. We must leave it to the parents and urge them to understand that the mind is, in fact, the center of the human body. A broken arm can be repaired.

"To supplement the teaching of the "school" of physical culture, Dr. Bolt advocates a program of health education which would include physical education, hygiene, and the essentials of the science of nutrition. Such a program, he declares, is badly needed to meet the public's demand for information that the school offers.

"The meeting is sponsored by the Waukesha Ministerial Association and the Wisconsin Christian Education Council.

The Rev. E. J. Schrumpf, pastor of Salem Evangelical Church, Waukesha, will introduce the speakers to a group of Sunday-school teachers to urge greater emphasis on honesty in their classroom.

CHEATING ADMITTED

Rev. Schrumpf declared he was moved to present the issue after examining the records of the Waukesha senior class in which the pupils frankly admitted cheating and dishonesty in examinations of school subjects.

Questionnaires returned from other high schools in the State showed a similar situation in greater or less degree, the Rev. Schrumpf declared.

The questionnaires drew up by Prof. Max Otto of the University of Wisconsin following discussion at the Wisconsin State Teachers Association last fall of the discovery of widespread dishonesty among students at the University.

Answers reviewed by the Rev. Schrumpf indicated the students desired to as-

sume the greater part of responsibility for the situation.

Students answering the questionnaires were given the privilege of making suggestions as to remedy for dishonesty. Some of the suggestions included that greater punishment be meted out to cheaters, honest students be less reticent to expose their dishonesty, and teachers be more lenient in their attitude toward students who would otherwise refrain from cheating, causing them to feel compelled to do so because they were not punished.

# Turn Carbon Into Power.

## CARBON ADVANTAGE SAYS AUTO EXPERT

By C. C. MOORE, JR.  
Research Engineer

"When any type of gasoline is used in an automobile engine, a certain amount of carbon is deposited on the piston head and combustion chamber. This carbon deposit gradually increases until the familiar 'carbon shock' or 'ignition shock' becomes apparent. Many cases of so-called loose wrist pins, piston slap, worn main bearings, etc., are in reality nothing but this carbon shock."

"Carbon shocks are in reality detonation, the most harmful destructive force known to explosive engineers."

"When detonation is taking place, it causes an increase in the rate of carbon formation."

"As the detonation becomes more severe, more carbon will be deposited, with a consequent greater detonation, etc., until it is practically impossible to run the motor without having the carbon removed."

"When using Ethyl gasoline, however, detonation does not occur, because Ethyl gasoline completely eliminates detonation. A more powerful explosion results also, because the compression ratio of the motor is raised by the formation of carbon."

"As a practical example, consider the following: A popular medium-priced car has a designed compression ratio of 6.5 to 1. The piston displacement of each cylinder is .62 cu. in. The capacity of its combustion chamber is 1.15 cu. in. If a carbon deposit one-sixteenth of an inch thick is formed in the combustion chamber, this carbon will decrease the volume of the combustion chamber 1.2 cu. in., and the compression ratio will increase to 5.15 to 1.

"This raising of the compression ratio will increase the thermal efficiency of the engine about 2.5% and the volumetric efficiency of the engine will increase about 12%.

"This means that the overall efficiency of the engine has been increased approximately 10% by the carbon deposit, provided the carbon deposit is utilized."

"With ordinary gasoline under a heavy load, detonation will take place and this theoretical increase in efficiency will not be realized. In fact, there will be a decreased acceleration in traffic."

"However, with Ethyl gasoline, the full theoretical efficiency is immediately realized. The motorist will notice increased power on hills and under heavy loads, greater maximum speed and a quicker acceleration in traffic."

"Thus with Ethyl, carbon is actually utilized in developing more power and smoother engine performance."

"Only two points of caution would I advise."

"First: Be sure that you are using genuine Ethyl gasoline in your car. Many imitations of Ethyl are on the market. But not one of these imitations will suppress detonation. My dynamometer tests have proved this fact."

"Second: When you fill with Ethyl gasoline make a slight adjustment of your carburetor. Proper attention to this one point alone will assure you of getting the maximum benefit from the Ethyl fluid."

Swiss Watchmaker

A Little smile is all you need.

Annoying engine shocks caused by carbon are now completely removed. Vibration is reduced. Acceleration is quickened. More power is available on hills and heavy pulls.

The secret is Union-Ethyl, the new scientific super-fuel.

Ten gallons in your motor will tell you much more than we can put in print or any famous scientist can tell you. Make the test today. Learn why millions are using no other kind of gasoline.

WITH ordinary motor fuel, carbon causes "engine shocks" and a consequent loss of power. Union-Ethyl, however, completely eliminates these shocks.

With this super-gasoline, carbon actually increases instead of lessens power.

Highly carbonized motors run better with Union-Ethyl gasoline than carbon free motors without it. Carbon in cylinders is, therefore, now an advantage rather than a fault.

Vibration is minimized, often eliminated entirely, giving a smoother-running motor.

### Have Your Carburetor Checked

Many motorists find that they get even greater power and mileage from Union-Ethyl gasoline by making a slight adjustment in their carburetor and spark control.

When you fill today with Union-Ethyl, we suggest you have your carburetor adjustment checked. Then you'll be sure to enjoy the maximum benefits from this marvelous motor fuel.

### What This Means

No more scraping or burning out of carbon. Now you use it for the development of power.

You enjoy faster pick-up in traffic and less gear shifting at traffic speeds than you have ever known before.

You need not shift on many of those famous hills that formerly required second.

You enjoy a greater flow of power at all speeds.

Now heating of motors on long hills or mountain climbs is greatly reduced by this marvelous gas.

And the color has nothing to do with the quality

You owe it to yourself to make a test.

Get ten gallons today wherever you see the Union-Ethyl sign.

First drain your tank of old fuel, refill with Union-Ethyl, then check your carburetor to make sure you are getting maximum efficiency.

Soon you'll be turning carbon into added power. You'll be enjoying a smoother, sweeter, swifter, more silent motor than you've ever had before. And with that experience, a new joy, a new thrill will come to motoring.

# Hotel Mayfair Will be Opened Tomorrow Night With Elaborate Dinner-Dance

STRUCTURE ENHANCES CITY'S CHARM

Grace and Luxury With Club Atmosphere

Hotel Mayfair

The seventh street structure built at cost of \$2,500,000 and to be opened tomorrow night with dinner-dance.

## HOSTELRY COMMANDS VIEW OF CITY

Sited on West Seventh Street and Cost \$2,500,000; Preview Banquet Will be Served Tonight

Having a dinner-dance, with music by the Rainbow Isle Orchestra under direction of George Eckhardt, in the Hotel Mayfair, representing an investment of approximately \$2,500,000 and commanding an unusual beautiful view of the city, the mountains and the Hollywood area, will be formally opened tomorrow night. The new hostelry is located in the 1300 block on West Seventh street at Hartford, only a short ride from the city center, just out of the congested traffic district.

Adams, the greatest decorator of the eighteenth century. The hardware and the soft blending of the green woodwork, relieved with gold moldings and ornaments all toned down to a soft mellow tone, give them a first-class richness and refinement.

The Elizabethan ladies' lounge has been carried out in solid oak wainscoting, the ceiling divided into near-square panels, each containing a small English heraldic design that conform with the decorations in the lobby and in the dining-room.

The lighting fixtures also carry out the Adams idea, modification of the candles used in that period. The lobby chandeliers represent a large glass lantern, inclosing myriad electric lights. From the ceiling of the room many arms branch out, each with its own candle. The lights in the dining-room are two-tiered flared arms, branching out in twenty-four arms. An orchid glass is used on the underside of the lights, giving an indescribably beautiful glow. The light fixtures in other crystal chandeliers are very distinctive.

In the mezzanine lounge, with its beautiful archways looking down on the main floor, is the most private dining-room. The latter are finished in dull yellow with a base of red marble. The paneled walls are relieved with relief reproductions of well-known portraits such as "The Laughing Cavalier," Rembrandt's self-portrait and others.

**RAINBOW ISLE**

But the real thrill of the hotel comes with a visit to the supper-room, the "Rainbow Isle." The moment you step off the elevator and into theoyer of that room you are in a world picture of brilliant colors stimulate the imagination.

In the words of Ken Weber, who designed the supper-room, it is "American jazz music translated into form, color and design."

The mirrored dance floor flashes a thousand and one glistening lights in its gold and silver bloom—a veritable rainbow decked with the brilliant reflected colors.

Giant torches stretch toward the rose-dusted ceiling—which has an eerie light effect, set off the black sky. Lightning-streaked, showing in the center. Neon lights are responsible for the fairy look and it is said that it is the first time these lights have been used in America as interior illumination.

The hotel suggests a well-appointed home or club rather than a hotel. The 350 rooms, each with a separate bath and all having outside exposure, are a feature. An unrivaled view may be had from all the rooms, varying as to location—mountain, Hollywood, the surrounding country or the business section of the city.

**RICH FURNISHINGS**

Barker Brothers were given the commission to furnish this impressive new building, a project of such interest and magnitude as to stimulate the decorators to every effort to produce a masterly result.

The great hotel with about 400 guest bedrooms, thirty-six superlatives, lounge, dining-room, restaurant, coffee shop, cafeteria, beauty shop and ladies' rooms is a house—a hotel of which all Southern California may well be proud.

The furniture was selected with

## BUILDING DONE IN YEAR

Engineers Overcome Difficulties and Set Up Record in Construction

Periodically, American engineers and constructors are asked to do the near-impossible and they proceed to do it. There are numberless instances in the history of transforming a virgin continent into a teeming industrial empire, of almost miraculous engineering feats in point of the speed with which an object has been obtained or a structure completed:

Los Angeles, the city of fantastically rapid development, ushered in this week to its circle of exclusive hosteries the Hotel Mayfair, built by the Horatio M. Baruch Corporation.

Begun in the middle of March, 1926, the edifice was scheduled for completion by February 15, 1927. Including special materials and equipment obtained from sources scattered over the country, the elaborate structure called for a careful schedule and closely planned coordination.

### PILE DRIVING REQUIRED

As soon as excavation was commenced it was found that the foundations would have to be placed upon piles. Day and night work was resorted to pile-driving equipment was brought from Omaha. The largest building foundation job in Southern California ensued. The prospect of a sixty-day halt in operations, the period necessary for driving these piles, faced the builders. Those who witnessed the work in progress will remember yet the appearance of the deep excavation, weirdly lighted by batteries of floor lights, and the ceaseless activity of the pile-drivers.

It will be remembered, also, that at this stage of the construction a heavy rainstorm occurred in Los Angeles, in which the precipitation was

### POLAND—THE KEY NATION OF EUROPE

"Poland is the key of the European edifice," said Napoleon I over 100 years ago, and J. D. Whelpley, writing in Current History for December, reaches the same conclusion.

He says: "The foreign relations of Poland are more important than ever before. In the East and the north, having directed orchestras in San Francisco, St. Louis and Chicago.

Broadcasting. Every evening the band will broadcast over KFWB between 10 and 11 o'clock every evening except Sunday.

It becomes involved, and when the disturbance would end or how it would end no one can tell with certainty. Currents of international politics today would dare predict. On the eastern boundary of Western Europe a united and prosperous Poland should be the chief factor in the advance of Communism. Divided and weak, her territory would become the western boundary of Eastern Europe under the influence of anti-Soviet Communists. It is to the general political and material interests of the whole world that Poland should be sufficiently successful in the carrying out of her aims for recognition, to prevent disturbances from within and to maintain her position in the international councils."

# Hotel Mayfair

Opens with brilliant dinner dance

TOMORROW NIGHT

LOCATED on West Seventh at Hartford...out of the traffic congestion but only five minutes from Broadway...stands Los Angeles' newest hotel de luxe...the Mayfair. It rises on a magnificent site...thirteen stories of beauty and grandeur!

Entered through charming Georgian doors is a lobby of soft greens mingled with gold. A place of velvet luxury and silken comfort, with hangings rich and beautiful...every piece of furniture, every canopy, every decoration specially designed and executed for Mayfair. On the same floor is a stately dining room, a coffee shop swagger as Georgia Inn of old, and a feminine lounge befitting the ladies of court.

Above are three hundred and fifty rooms, each with an outside exposure...each flooded with California sunshine and commanding a marvellous view from the mountains to the sea. Here again specially designed furniture the finest that can be devised.

The Mayfair is under the management of John J. Hansen, known far and wide as the host of the Hotel Coronado, and others of the country's famous hotels. It was erected and is owned by the Sun Realty Company whose development activities include the Roosevelt Building, Sun Finance, Barker Brothers Building, Insurance Exchange Building, Lincoln Building and other notable business structures in Los Angeles.

### MAKE RESERVATIONS NOW

...for the opening dinner dance in Mayfair's unique and dazzling supper room...

Rainbow Isle

You dance on a glass floor flaming with light! A chaos of color...soft, hidden glows and glittering torches...beautiful gowns and gorgeous draperies...caught in this mirrored floor and flashed back like beams from a huge blinding diamond! Decorations and appointments luxurious as they are modernistic...atmosphere exotic and sophisticated as the last note from Broadway! Life...movement...gaiety at whirlwind pace! That is Mayfair's "Rainbow Isle!"

Smart joyous throngs...newest and cleverest of entertainers...the finest of modern dance music...every feature of night life from the world's capitals of pleasure...awaits you in Mayfair's "Rainbow Isle!" Reservations should be made at once...Telephone Flitzroy 4161.

Beginning with the opening night the Rainbow Isle Orchestra will broadcast its supravoice dance music over KFWB every night, between 10 and 11. (Courtesy of Bundy and Albright). Thus in on Rainbow Isle...at the end of the rainbow there's happiness."

Reservations are now being received and filled for hotel accommodations at Hotel Mayfair. Telephone Flitzroy 4161.

Designer Defines Ideal of  
Supper Room

BY KEN WERNER  
Art Director, Warner Bros.

What do you call this? It is the standard question asked me in regard to the design, its reason and execution. It is not new and cannot very well be attributed to any of the recognized designs, forms or color combinations of those things that we all know, from the Assyrians' or Egyptians up to early American. But since it is something, it must have a name, and that is where the problem begins. I am talking about the supper room of the Hotel Mayfair. The Rainbow Isle, with its foyer, balcony, dance floor, lights, tables and chairs like any other supper room and yet something else—something pleasing all right—dancing with joy and color—but why? What is it? Where does it come from? and what does it tell?

I wonder what James Watt told them when he rods up the Glasgow River with his first steamboat. In fact, the truth is that whatever he told them did not help him, because he found himself in a lot of trouble on account of his devilishness. Now he is standing in the park, hewn out of stone, in front of the postoffice with

FIGURES SHOW  
PROPORTIONS

Floor Embraces 120,000 Square  
Feet; Millions Brick Used  
in Construction

Some of the quantities involved in the construction work of the new Hotel Mayfair as compiled by the construction company give an indication of the work accomplished ahead of the working schedule. Some of the figures follow:

Floor area: 120,000 square feet.

Cubic volume: 3,100,000 cubic feet.

Cubic yards of concrete: 8500.

Square feet of interior partitions: 200,000.

Square feet of exterior terraces: 21,000.

Number of common brick: 1,000,000.

Number of face brick: 400,000.

THINGS AMERICAN

I don't want to be hewn out of stones or burned to death or roasted over coals, nor to be buried today, trying to understand why today is not like yesterday, trying to find out why it cannot be Greece, Italy, Austria, Poland or America as it was 100 years ago, so that I can ride my self of traditions that do not fit into the seat of my motor car.

There are many things typically American, in the field of technique, of business, of our daily comforts and utility—all beautifully reflected in the rhythmic, colorful, decorative schemes of American music. It is an American expression in spite of the fact that we all accept, admire and adore Beethoven.

This is a relation between

Lynard music and the advancing riot on Broadway at night, the hum of our motors and the power lines stretched over the horizon through a yet to be developed country.

In Europe, in South Africa, in China or in Bombay, we find American jazz governing, holding its own under its own name. I think it ridiculous to talk about the ultimate at this time—in this period of rapid advance—in the days when we dream, discuss and actually consider passing planes to the Moon. Africa as a daily occurrence; when we talk to London by telephone and do not as yet see any end to the development that is in progress. America's destiny may lead us. We are destined to try to experiment in order to advance.

MUSIC IN FORM

When I began to make my sketches for this little supper room with the idea of trying to transfer this American jazz into form, color and design, trying to express the spirit reflecting the purpose of its being, I did not begin with a mere hunch coming out of nothing, but I carefully made use of my own experience of sincere study in Europe and years of careful analytical observation, because I am quite conscious of the fact that an educated designer or painter enters when he leaves as conventional. But somebody had to leave it and I did, on an occasion, and I did it right, and this idea will find a fair reception among the younger people of our generation, those that dance, drive their cars, enjoy music and are otherwise as good, as progressive and as progressive as we all were—and of course to be

rhythmic form—rhythmic color! No grays—gray greens—old browns—old reds—old blues—a sparkle of light, a dance floor, a balcony, a foyer—playful. Just forms—supporting the imagination of the observer, the overtone of the room.

I hope it all comes off as I see it—not ultimate, but a suggestion and an encouragement to others to go ahead to develop and advance. A mere start.

LIGHTING  
FEATURES  
UNUSUAL

Pioneer Company Designs  
Fixtures That Add Much  
to Hotel's Distinctiveness

The lighting fixtures for the Hotel Mayfair present another unusual example of the interesting chandelier work being done by the Meyberg Company.

Fifty years ago the Meyberg Company started its business near the Plaza, and today it stands as one of the leaders in this line of endeavor in America.

In the Mayfair the lighting fixtures carry out an interesting design in light. The lobby chandelier combines in an interesting manner a large glass lantern, enclosing a myriad of candle lights, and from each corner of the lantern hangs a chain out, each supporting a candle flame, giving a light, cheerful effect sought for in that style of work. The chandeliers in the dining-room are two-tier fixtures of crystal and brass, each having twenty-four arms. The practical effect of these fixtures is no doubt one of the chief attractions of this beautiful room.

Particularly noticeable in the handling of the lighting fixtures for the hotel is the entire absence of wrought iron or anything resembling it. It is a change from the almost universal use in Southern California of the Spanish and Italian types of fixtures.

Doheny Builds  
New School in  
Nevada Town

TORONAWA (Nev.) Jan. 30. (Exclusive)—E. L. Doheny, the oil magnate, has some staunch friends in the 100 men, women and children, especially the latter, who make up the population of the little hamlet of Clay City, about 120 miles south of here. There is a school there.

Some months ago, when the children of the community, twenty-four in number, were attending school in an old shack, Mr. Doheny came to inspect the little city depositing being mined there on an extensive scale, the material being shipped to the oil refinery for filtering purposes.

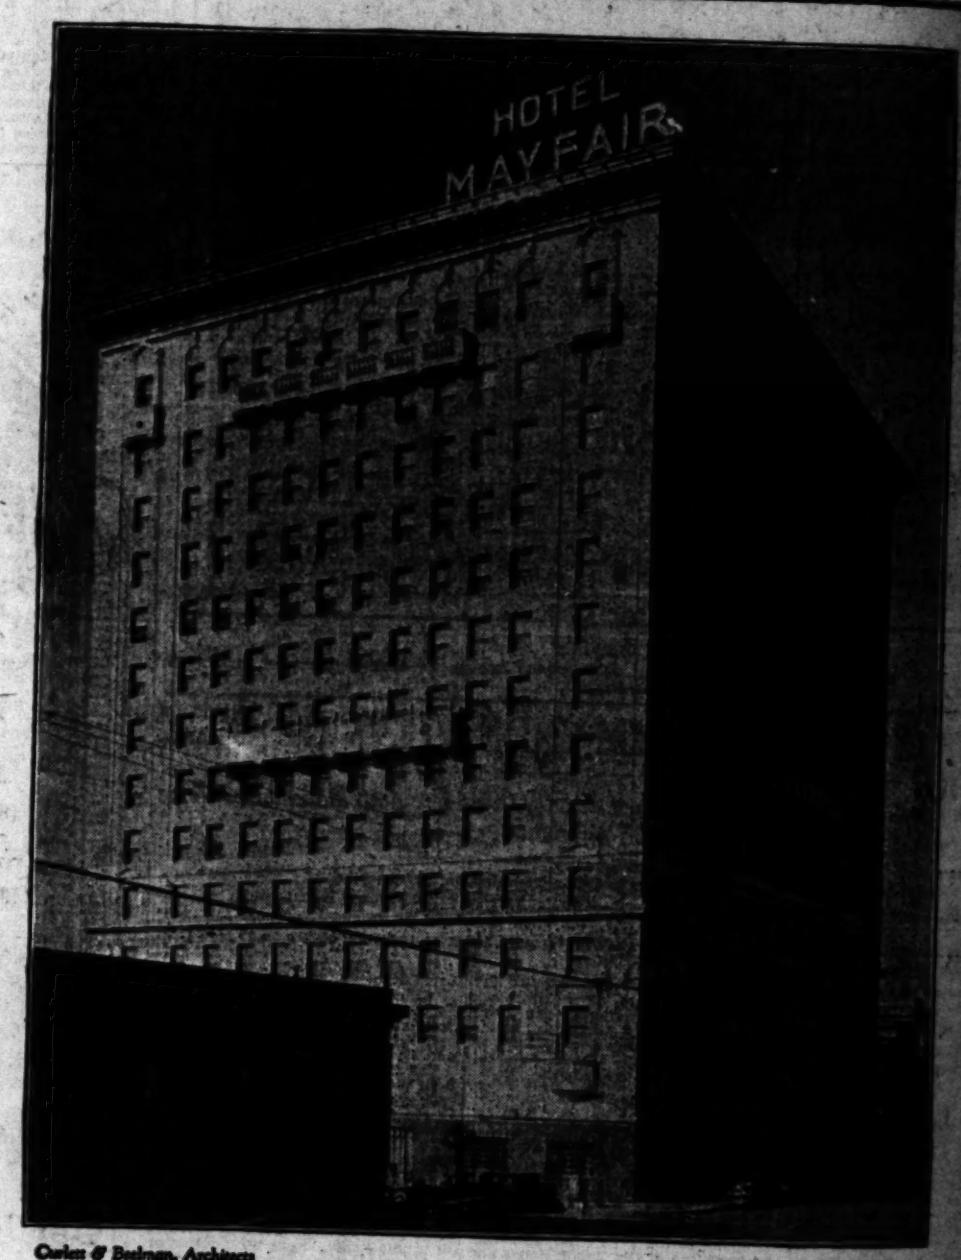

"I think the best you can do for the young people," his friends asked.

When they said that it was to immediately ordered that a suitable building and up-to-date equipment be secured and the bill for it all sent to him. The building and equipment cost \$25,000. Mr. Doheny paid the bill.

Small Hairpin  
Found by Wife  
Leads to Break

It was a very small piece of wire, but it sufficed to break up the home of Lester F. Scott, Jr., motion-picture producer, according to testimony of Mrs. Mary Chadway Scott before Judge Summerfield.

For the wire was bent into a hairpin and it led to a cake of scented soap, and the cake of scented soap

dress unknown, Mrs. Scott testified. Mrs. Scott said she became curious when her husband's business all of a sudden began to demand his absence over week-ends. He told her, she said, that he was working "on location" in Arizona, but just the same she felt impelled on his return from one of his trips, to examine the contents of his traveling bag.

The first object that met her eye, she related, was a hairpin. This led her to delve further and she eventually came across the cake of scented soap, she said. It bore the imprint of a blonde.

"So I employed a detective, and he found out that Mr. Scott had been at the San Diego hotel with a blonde,"

Mrs. Scott testified. "I never learned where he was or where she lived."

Mrs. Scott had written a short-

statement copy of the hotel register as

...new Mayfair  
will be a social life center.

## HOTEL HAS CLUB ASPECT

**Georgian Architecture, Rich Draperies and Luxurious Lounge Rooms Feature**

(Continued from Ninth Page)  
discriminating care from the master furniture builders of this country—fine reproductions of Georgian or late English period. Many unusual pieces could not be found and had to be specially designed by Barker Brothers. For example, the great high-backed curved end sofas, the quaint shaped chairs with crewel embroidery, the snug little love seats to match—unique pieces all of them.

Two fine renaissance octagonal tables with many legs complete.

“Wealthy room” from the old Chinese urn carrying great bouquets of bright-hued flowers make the tables the greatest attraction of the room. Four tall, straight torcheres, exquisitely designed and finished in silver, stand guard at the four corners of the room. The result is an atmosphere impressive and inviting—modern, yet restrained—homelike, yet dignified.

The dining-room gets its name,

“Wedgwood Room” from the border the gray panelled walls. Here,

too, the period is later Georgian.

A bright room in yellow, silver, orchid

and blue is richly decorated.

The curtains are canary yellow

with chairs and tables of Wedgwood blue.

**INVITING BEDROOMS**

All the bedroom furniture was de-

signed by Barker Brothers. The bed-

room group is notable for the per-

haps weight of the usual hotel fur-

niture, but smart lines such as in

a charming home boudoir. Most of

the groupings are painted, hand-

decorated in green. Some are sham-

elled in sprightly modern individual

style.

Large bedspreads are finest moiré

with real crewel embroidery edging

and large crest in center—all the

riches of colors.

The drapes hang full width and

straight to the floor—of superior

quality unfast frills, specially de-

signed by Barker Brothers. All the

carpets were designed by Barker

Brothers—the heavy Wilton

carpet room has a heavy lamp, a

desk lamp and a bridge lamp. They

are attractively carried out in bronze

finishes with fascinating hand-tailored

shades.

More than 100 pictures were needed

in the decoration and each one was

selected to fit a particular space.

Etchings, engravings, prints—im-

ported from England, France and

Germany, many of them. A really

fine collection.

Silver, china and linen designs were

all made with greatest discrimination.

Fine Rosenthal china was im-

ported—made according to Barker

Brothers' special design. The bedding

box springs and mattresses were

given careful study that they might

give the utmost satisfaction.

**NEAR CITY CENTER**

Five minutes away from the con-

gested auto traffic district, the hotel

will appeal to the motoring public.

There is plenty of room to park a

car.

The Mayfair Hotel was built by the

Sun Realty Company, of which I.

Eisner is president.

The music of the supper-room will

be furnished by the Rainbow Isle Or-

chestra under the leadership of

George Eckhardt, Jr.

The first preview dinner at the ho-

tel was given Saturday night by Mr.

Eisner and his wife to officers and

directors of the Sun Realty Company

and invited guests.

Elaborate preparations have been

## CONSTRUCTION REQUIRES YEAR

(Continued from Ninth Page)

and the building progressed at a fast

pace throughout the year.

In spite of the speed of construc-

tion throughout the job, there has

been no major accident of any sort.

The only injuries being of minor

character.

Since the original time schedule

called for completion by February 15,

the additional time for driving piles

required approximately two months

and caused the completion date

of the structure to the middle of April.

Major changes on the building

would have pushed it further on

than that.

The building is finished now

and its speed of completion has not

been allowed in any way to interfere

with the craftsmanship, visible in all

the ornamental finish work through-

out, stone, stucco, plaster, wood,

plaster, or paint. It signifies

intelligently directed effort, careful

engineering planning and co-ordina-

tion over the obstacles which are al-

ways present in the building of any

important structure.

## WIFE CHARGES WAGES USED TO PAY ALIMONY

Mrs. Gladys Dusey Harris has filed

with County Clerk Lampton her nomi-

nation of Walter J. Harris for the

distinction of “meanest husband.”

Harris, she declared in a complaint

for divorce, was wont to take her

pay checks from her, and apply the

proceeds to payment of alimony to her

predecessor in his affections. The

suit was filed by Attorneys Loyd

Wright and Charles E. Millikan.

**BUSINESS CLASSES OPEN**

Classes in rapid stenography, type-

writing and machine book-keeping,

free to the public and especially ar-

ranged for adults, will be started

at Manual Arts High School today.

**WARD**

NEW BEACHAREA  
MAY BE DRILLED

Leasing Occurs Northeast  
of Huntington

Two Companies Pick Up  
Extensive Acreage

Faulting Indications  
of District Emphasized

Extensive leasing half a mile north of the old Huntington Beach oil field makes it appear highly probable that within the next few months a drilling campaign may be launched there for the purpose of testing out the theory that an entirely new oil field exists there.

Huntington Beach, brought in the first of the Los Angeles basin oil fields—a field which was rather extensive and which appears to be long-lived. Last year it developed a field on the west side, toward the ocean—an area which went to a production peak of 110,000 barrels daily. Just now oil operators are testing the district beyond the eastern limits of the west and east and the far east side of the community, where the interest has swung to the northeast.

Within the last two weeks at least two companies have picked up approximately 150 acres in leases there, mostly in five-acre tracts. This was subdivided in five-acre blocks some years ago. The leasing is being done in the district lying just east of the corner of Main and Hampshire Streets, which is about a quarter northeast of the business district of Huntington Beach, on the North half of Sec. 36.

The leaseholdings comprise a mile and a half southwest of the location where the Shell company not long ago drilled its Von Schiritz well, which proved to be dry. In the area where the leasing is going on there are several small indications of faulting, and these lead geologists to believe that a new oil field perhaps exists there.

Cold and Snow  
Halt Activity  
in Oil District

HOLBROOK (Ariz.) Jan. 30. (Exclusive)—Cold weather has blocked much of the oil activity here and in the new field to the northeast near the New Mexican line. The oil companies have maintained one snow road which effectively stopped truck transportation from the Santa Fe Railroad.

Local interest attaches locally to a bill now in Congress demanding the rights of the States on school lands other granted lands with respect to minerals contained, especially coal.

In scrapping sales in this section the State of Arizona has tried to reserve all rights to itself, though losing when the question was submitted to the courts.

PLANT HERE  
TO TEST AND  
SAMPLE ORE

Local Company Launches  
Project of Twenty-five-Ton  
Capacity Daily

An ore-sampling and ore-testing plant of twenty-five-ton daily capacity, the first of its size constructed and operated in Los Angeles, has just gone into commission and is expected to be of material benefit and advantage to ore producers of the Southwest.

The plant was constructed by the Southwestern Engineering Corporation in connection with its metallurgical department, and will enable mining operators to sample mine products on an unusually large scale.

It is equipped to handle

the maximum amount of ore

available, and is designed to

handle a maximum amount of

ore.

The plant is being started on the Rattlesnake structure, thirty miles west of Farmington, 3000 barrels a day; Table Mesa, twenty-five miles southwest of Farmington, 500 barrels a day; Hogback structure, eighteen miles west of Farmington, 600 barrels a day; Bloomfield structure, ten miles east of Farmington, 100 barrels daily.

The plant is being started on the

Rattlesnake, Table Mesa and Bloomfield structures. Other structures which are shortly to be tested for oil production are Red Mesa, Blanco and Keweenaw. The No. 2 well on the Rattlesnake structure was recently completed as an 800-barrel producer at a depth of 827 feet. This extends the proven area of the field to the southwest. During December the Rattlesnake structure registered a pipe-line run of 74,000 barrels.

Several large producing companies entered the field during the latter part of 1926, having secured a considerable acreage, and are now drilling test wells.

Among these are the Ohio Oil

Company, operating on the Red Mesa structure, and the Standard Oil Company, operating on the Red Mesa structure.

The Union Oil and Mining Company, operating in the Blanco district, has 2000 feet of oil in a hole which there are three strings of tools lost which were bottomed in the Mesa Verde sand at 2850 feet. This hole has no water and has a gas flow that causes it to spray 100 feet high. It is now under way, and if successful, the top of the bottom may be tested. It is reported that this sand was barely encountered when the first string of tools down 2000 feet.

The Union Oil and Mining Company, operating in the Blanco district, has 2000 feet of oil in a hole which there are three strings of tools lost which were bottomed in the Mesa Verde sand at 2850 feet. This hole has no water and has a gas flow that causes it to spray 100 feet high. It is now under way, and if successful, the top of the bottom may be tested. It is reported that this sand was barely encountered when the first string of tools down 2000 feet.

The Midwest Refining Company, which brought in the first producing well in the basin on Hogback, came in October, 1922, and which is left standing, has returned to the field and is drilling again. The well was drilled in the Seven Lakes district, with the announced intention of going 4000 feet, if necessary. A number of shallow wells have been produced in small quantities in that district for several years.

The San Juan Petroleum Corporation, operating on the Palmer structure, located in the south end of Farmington, on the Glade structure, has reached a depth of 700 feet with a showing of gas and oil and is drilling.

The Portage Oil and Gas Syndicate, after a long struggle, got a salt water at 1827 feet. It is running six-inch casing at 1850 feet.

It is located six miles northeast of Farmington, on the Glade structure.

On the Red Mesa structure, Sec. 28-12, has a fishing job at 2250 feet.

## SECOND WELL BEGUN

## SIGNS POINT TO ACTIVE YEAR

General Survey of San Juan Basin Oil Situation Held  
Indicative of Much New Development

SPRINGFIELD (Mo.) Jan. 30. (Exclusive)—With the approach of spring the San Juan Basin oil fields face the prospect of an active development campaign. The pipe-line run of oil from three different fields at present totals 4000 barrels a day. This oil is of exceptionally high gravity, ranging from 80 to 70 degrees.

The daily pipe-line run is listed as follows: Rattlesnake structure, thirty miles west of Farmington, 3000 barrels a day; Table Mesa, twenty-five miles southwest of Farmington, 500 barrels a day; Hogback structure, eighteen miles west of Farmington, 600 barrels a day; Bloomfield structure, ten miles east of Farmington, 100 barrels daily.

The daily pipe-line run is listed as follows: Rattlesnake structure, thirty miles west of Farmington, 3000 barrels a day; Table Mesa, twenty-five miles southwest of Farmington, 500 barrels a day; Hogback structure, eighteen miles west of Farmington, 600 barrels a day; Bloomfield structure, ten miles east of Farmington, 100 barrels daily.

**COPPER GLANCE FIND REPORTED**

United Verde Extension said to be fortunate

Company branching out in foreign fields

Arizona prospects declared good at 1450 feet

(Exclusive)—United Verde Extension, a mine in which successful operations usually are kept well guarded, is reported to have cut about sixty thousand pounds of copper glance ore in a drift into Florence ground, though no intimation has come from the management of such good fortune.

The Florence claim for some in the past has been held jointly by the United Verde and Extension, latter purchasing United Verde's after drilling operations had been discontinued to have missed the oil ten feet.

President James S. Douglas, manager George Kingston has leading during the last few months a broadening of the scope of his purchases. They are said to be negotiating for properties in Chile, where company operations have been started in a new area near Bithes. In addition, they are reported to be pursuing large interest in an undeveloped lead-zinc mine in a small field in Missouri, to be developed by a new organization, the Douglas Mining Company.

Verde Central is another promising mining unit. It is being kept dry by heavy rains and its workings are being cleaned under the ore bodies developed above. A long crosscut on the same level is reported to have been driven 1500 feet and a shaft encountered a heavy oil at 1700 feet.

A favorable average has changed hands to the north of the Maljamar

**Late Reports From California's Great Petroleum Pools****ARTESIA WELL HITS RED SAND**

*Discovery in Maljamar Field Regarded Important*

*Prairie Sets Casing in Hole on Keel Permit*

*Marland Still Adds Acreage in Southwest Area*

ARTESIA (N. M.) Jan. 30. (Exclusive)—In the Maljamar oil field, the red sand has been encountered in the Ingleside Bridge No. 1 on Sec. 4, 17-34 from a depth of 3898 to 4060 feet, this carrying about 100,000 cubic feet of gas. The well is located on top of the cap rock, twelve miles east of the Maljamar discovery well. The "keel" is expected to be approximately 4000 feet.

The No. 1 State permit well of the Maljamar Oil and Gas Corporation on Sec. 16, 17-32 is cleaning out after shooting the lower sand from 4070 to 4105 feet and another shot from 3785 to 3815 feet. This probably appears to be considerably better than the discovery well, which continues to make 150 barrels daily.

Contractor, Mr. J. L. D. Miller, of this company is the best producer of the Maljamar field. The hole is standing full of oil, with the bottom at 3850 feet. The oil tests clear and dry gravity.

Casting has been done in the Prairie Oil and Gas Company's No. 1 on the Keel permit, Sec. 10, 17-31, to about 4000 feet water encountered under the cap rock. This well is one mile north of the discovery well and has been capped for the last six months, but there is said to be little conformity between the logs of the two wells.

Two miles north of the Prairie test, the Texas Company is moving tools to a location on Sec. 34, 18-31, this being the first of seven locations recently leased.

The Marland Oil Company continues to purchase acreage, checkerboarded through Southeastern New Mexico. It now controls over 150,000 acres, and has made a heavy rig to the west end of the line of Sec. 11, 20-30. This is four miles northeast of the Well test that encountered a heavy oil at 1700 feet.

A favorable average has changed hands to the north of the Maljamar

**TUNGSTEN MINE HEAVY SHIPPER**

*Half of American Output is Said to Come From Nevada Estate*

More than one-half of the entire American tungsten production is coming from the properties of the Nevada-Massachusetts Company located near Mill City according to the management.

About twenty-five tons of concentrates, averaging over 76 per cent tungstate acid, are shipped monthly, with sufficient ore said to be exposed to insure a long period of production.

The concentrates are said to be the richest produced in the world, as chemically pure tungsten runs slightly over 80 per cent in tungstate acid. The ore is treated by flotation, followed by roasting and concentration.

feld during the week, the Humble Company taking 7000 acres of State leases in Township 15, Range 32

**THE "COMMON COLD" IS VERY COMMON**

Acute coryza, which is the common cold, is said to be the most prevalent of all the maladies of mankind. Recent investigations seem to indicate that it prevails to about the same extent in one part of the country as another without regard to climate or temperature.

A sixteen-ton mill has been turned over on the San Juan mine in Gold Basin. The ore to be handled is from a blanket formation, similar to that of the near-by Cyclop, and is reported to average \$10 in gold. It is operated by Denver interests.

If any to be found.

Property owners realize that if the well doesn't find any oil they will not benefit and many of them are depending on the principle that "a bird in the hand is worth two in the bush."

If no oil is found in the San Martines well the property owners will still benefit, as will the operators, and will be fairly well satisfied if oil is found to be worth receiving considerable income from their property.

There are now about twenty wells drilling in the district of San Martines street.

The Richfield Oil Company signed up a ten-acre community lease on Walnut street between Tenth and Eleventh streets during the week.

The lease covers the same area as the San Martines well above.

Indications are that the McPherson mine will ship in

indication of oil, and provides that only three wells be drilled on the property.

RECENT LEADS

The Jamison Oil Company has obtained a three-job lease at the corner of Olive and Fourteenth Streets from W. R. McKee, of Huntington Beach, and W. E. Morris and E. Haskell of Santa Ana.

George F. Getty has leased a forty-five-foot drilling site at the corner of Olive and Fourteenth Streets from Jack Colvin and W. J. Ellery. The land is almost in the shadow of the San Martines well and is in the same block.

J. S. Haskett, formerly an independent operator in Montana, Wyoming and Oklahoma, has secured a small several lots on the corner of Tenth street and First Avenue.

The lease is just across the street from the St. Simon and Jude Catholic Church. A derrick is to be built by Haskett at once.

S. E. Andrews, real estate dealer; Hansel Larter, director of the Home State Bank, and W. D. Young, local attorney, have leased their residence property to oil companies for early drilling.

MUSSOLINI GOOD RAILWAY DAY WORKER

DUKE WHO MAKES POOR ITALIAN ROADS PAY GOT 50 CENTS WAGE

Discovery of an old railroad road book at Lugano, on the Swiss-Italian frontier, has revealed that Benito Mussolini was known as a "diligent and steady worker" even when employed as a stone mason at an average wage of one shilling a day. Mussolini was employed at the site during the construction of the Monte Bre railway at Lugano twenty years ago.

The pay book records the wage payment made to Mussolini, and from this staff register it was learned that no complaints were made against him in his work during the time he was employed.

Writing in the current magazine of the New York Central Lines, Arthur Stoll, English writer, says that to date the most humble stone mason is the moving mass "that has proved probably the most important postwar railroad rehabilitation plan in Europe."

"Under the Fascist regime in Italy," he says, "there would have been abolished a great deal that the American and the Englishman directed people to do for example, democratic rights to a freely elected parliament and liberty of press. To Mussolini, however, must go credit for much that is progressive, especially in his own country's cause, and the wonderfully inspiring effect of the new order of things is nowhere more apparent than in Italy."

To turn a railroad deficit of \$60,000,000 into a profit of \$10,000,000, while at the same time transforming an entire railroad personnel into an enthusiastic, good-willing workers, as has been accomplished in Italy in three years, is certainly a remarkable achievement."—New York Herald Tribune.

WOMAN IS SHERIFF

The Second One in England to Hold That Office

The appointment of Mrs. Lucia Marion Foster Welch as Sheriff of the county borough of Southampton, another indication of the way in which women are forcing to the front in British public life.

She is the third of the new Sheriff to be appointed since the creation of the office at quarter sessions, act returning officers in parliamentary elections enforce the judgments of the higher criminal courts.

Mrs. Welch is a plump woman, the first woman member of the Southampton Council and one of the first women to sit on the board of managers of a corporation. But she is not the first woman Sheriff that honor belongs to Mrs. Lucy Green Wells, who became Sheriff of Canterbury in 1922. She was the first woman to be elected Sheriff of London to hold the ancient office of Sheriff.

Before 1919 it would have been impossible for a woman to be a Sheriff, but in 1919 the sex discrimination removals act was passed, and this was one of the old "bars" that were swept away.—[Answers London.

**FUTURE OF MINE SEEN AS BRIGHT**

*Emerald Isle at Kingman Believed Coming Copper Property of Southwest*

KINGMAN (Ariz.) Jan. 30. (Exclusive)—Declaration is made locally of belief that the Emerald Isle is one of the coming big copper mines of the southwest. Development on the 300-foot level for 800 feet along the vein master is reported to be through, ore sampling 8 per cent. There will soon be a demonstration of the width of the mineralized area. This mine is notable for the quantity of its surface carbonates, which a few years ago, were leached in an inadequate plant.

More than one-half of the entire American tungsten production is coming from the properties of the Nevada-Massachusetts Company located near Mill City according to the management.

About twenty-five tons of concentrates, averaging over 76 per cent tungstate acid, are shipped monthly, with sufficient ore said to be exposed to insure a long period of production.

The concentrates are said to be the richest produced in the world, as chemically pure tungsten runs slightly over 80 per cent in tungstate acid. The ore is treated by flotation, followed by roasting and concentration.

feld during the week, the Humble Company taking 7000 acres of State leases in Township 15, Range 32

**DRILLERS LEASE MANY CITY LOTS**

*Operations Start With Rush at Huntington Beach*

New 1200-Barrel Well Starts Renewed Activity

Contracts Command Bonus of \$1000 and Royalties

Leasing activity east of Seventeenth street in Huntington Beach, which has been dormant for some time, is starting up with a rush.

Leases are commanding \$1000 cash bonus and a substantial royalty.

They contain drilling clauses providing for drilling operations to start within thirty to ninety days.

The Oilfield Company, which has just brought in the first producing well east of Seventeenth street, according to reports. The well is situated on Seventeenth street, three miles south of Dorman, seven miles south of Cisco, and run near Putnam, fifty-four miles from Comyn, the first pump station will be erected.

The line continues on to Hawley, taking care of the Jones county and Nodice Creek production, which turns due north to the Panhandle.

The new line upon the plains will be welded to prevent breaks in pipe, expand 315 miles. The 100 miles on the Comyn end of the Panhandle will be completed in the usual manner. More than 300 men are now working on the line, in the vicinity of Leon.

The Humble Pipe Line Company is enlarging every pump station from Comyn to the Hedgeship ship port, and laying a ten-inch, twelve-inch line from Comyn to Webster, the receiving station at tidewater.

FIRST TEST BEGUN

Wildcat Drilling on Bloomington Dome in New Mexico

KINGMAN (Ariz.) Jan. 30. (Exclusive)—Drilling has been started in the widest Bloomington Dome field in Mohave county, south of the Utah line. The first well, that of the Mid-American Oil Company, is of unusual size, 122 feet in height.

Drilling also is reported started on the dome in the Union Oil Company's lease in the same section on the Virgin River, fifty miles below the Virgin River field, where a number of small producers have been known for several years past.

**PIPE LINE OF HUMBLE OIL PROGRESSES**

*Equipment for Project in Texas Field is Being Installed on Route*

CISCO (Tex.) Jan. 30. (Exclusive)—Equipment and other facilities for handling oil through the 315-mile pipe line which the Humble Pipe Line Company is constructing from Comyn to Borger, in the heart of the Panhandle field, are being installed at Humbletown, near Cisco, and at other points along the route.

The cost of pipe line, pump plants and other appurtenances will be about \$10,000,000. As Comyn the line will connect with the large tank farm and pump station of the Humble Oil and Refining Company.

The line will extend south of the town limits of Cisco, and run near Putnam, fifty-four miles from Comyn, the first pump station will be erected.

The line continues on to Hawley, taking care of the Jones county and Nodice Creek production, which turns due north to the Panhandle.

The new line upon the plains will be welded to prevent breaks in pipe, expand 315 miles. The 100 miles on the Comyn end of the Panhandle will be completed in the usual manner. More than 300 men are now working on the line, in the vicinity of Leon.

The Humble Pipe Line Company is enlarging every pump station from Comyn to the Hedgeship ship port, and laying a ten-inch, twelve-inch line from Comyn to Webster, the receiving station at tidewater.

**MINING STOCKS ARE BOOMING**

Here Are Some Advances of the Past Few Days:

CHOLLAR	15 cents to 35 cents
SCORPION	35 cents to \$1.10
SAVAGE	15 cents to 35 cents
GOULD & CURRY	21 cents to 38 cents
COMSTOCK	35 cents to 55 cents
ARROWHEAD	3 cents to 29 cents

Many thousands of dollars in profits have been made since the first of the year by speculators who have followed our advice in the purchase of these and other mining stocks.

In our opinion the great activity in mining shares has just started, and there are numerous opportunities today to get into stocks that may bring you early and large returns.

## Alcoholic Death Rate Figures Go to Highest Point

**NEW YORK.** Jan. 30. (AP)—More deaths from alcoholism in 1926 than in any year since 1917 were recorded among the 17,000,000 policy holders of the Metropolitan Life Insurance Company, says a report made public by the company.

The trend continues, the report says, the death rate from alcoholism will be as great by 1928 as during the worst of the pre-war years.

For 1926 the company's figures show 3.5 percent of policyholders aged 25 to 64 died of alcoholism, up from 3 per cent in 1925. The 1926 rate was six times as high as that of 1920, when the record low rate was established.

**SISTER IDENTIFIES BODY OF BROTHER**

**MINDEN** (Mo.) Jan. 30. (Exclusive)—Identifying the body in a lone desert grave as that of her long-lost brother, Miss Matlyn Brennan of Peter Brennan to Chicago for burial in the family plot. Brennan was killed in a mine accident last October and no name or account of his death could be found. Her body, guided the sister to her last quest. Brennan left a small amount of money and several mining claims.

**CHARLOTTE ESTATE FIGURES DWINDLING**

**BRUSSELS.** Jan. 30. (AP)—The estate of the former Empress Charlotte, widow of Maximilian, one-time Emperor of Mexico, will not be so large as expected. It was estimated soon after the death of the Empress that her estate was worth about \$100,000,000. This has dwindled to about \$70,000,000 after deducting inheritance taxes and other charges. The Belgian agency understands, on that each of the six heirs will receive \$120,000.

**CEMENT SACKS CRUSH BOY PLAYING PIRATE**

**SAN FRANCISCO.** Jan. 30. (Exclusive)—Five-year-old Tony Finch liked to play "pirate cave." Late Saturday afternoon he crept into the dark space beneath the floor of a house sacks about half a block from his home. His crushed body was found there today after the sacks had been removed. His mother is pro-

MIGHTY DRAMA  
OPENS TONIGHTture of "The Miracle"  
Set for 8 o'clockCity and Cinema Leaders  
Scheduled to AttendPeople Continue to Crowd  
about Box Offices

"The Miracle," the great drama for which Los Angeles has waited for several months, will open at 8 o'clock tonight at the Shrine Auditorium. Those attending should be in their seats by 7:30, at 8 o'clock. That is the hour when the orchestra shuffles in with lights and candles and sits under the spell of great production.

Those who are not seated by 8 o'clock must stand at the back of the hall until the first intermission. This will cause some to lose much of the action of the spectacle and will detract to some extent from enjoyment by the rest of the audience.

The weeks of preparation for what is expected to be the greatest drama ever staged, Los Angeles will get its first glimpse this evening of "The Miracle," the mighty spectacle that is deficit more than \$2,000,000.

In Anglo society, cinema magicians, film stars, art lovers, as well as a host of out-of-town visitors will make up the magnificence in the auditorium, while the Antiochians have been brought in to witness this stupendous creation, which was created through the genius of Max Reinhardt, Max Lederman, and others, and a long list of other artists from New York, one of America's foremost theatrical products.

For several days through the season, news came from about the state, and thousands of orders have been pouring in by mail from all parts of Southern California, other sections of the Pacific Coast, and abroad, to buy tickets, which will be available to those arriving.

BOX OF PRODUCTION

The play opens at the Shrine Auditorium until February 26, next, at plenty of seats still available.

It is one of the performances during the period. For this evening there will be two seats and after that, which will be available to those arriving.

A sum of \$200 is looking forward to a great opening with live music, dancing, and singing, will be given by Lucy Diana, Mannheim, wife of the Madonna; Iris Tree as Dorothy Caldwell as the princess; and the orchestra brought here by Harry A. Stanley of Guatemala City, and American in the service of the Guatemalan government. The most striking thing about the show is the shadow of death: Max Reinhardt as the mad emperor, King Alfonso, the Cardinals, and Presidents.

It should be emphasized here the actors, but the spectacle is to be seen in the most inaccessible regions, where contact with the white population is infrequent. Consequently they have maintained their ancient culture to an astonishing degree.

(Continued on Page 2, Column 4)

## MAIL FLIES CHEAPER NOW

**Mail Air Rate of Ten Cents Each Half Ounce to All Points Replaces Old Schedule at Midnight**

One of the most advanced steps yet taken in America's development of commercial aviation is scheduled for this midnight, when the present commercial air-mail rate structure, based on a per-ounce-per-mile and calling for a minimum in rates of from 8 cents to 30 cents as between cities, is to be replaced in favor of a universal blanket rate of 10 cents per half-ounce, or from any point. Establishment of this universal rate is expected to reduce the cost of the fast, safe service offered by aerial post first, because it simplifies practice and, second, because it actually means a reduction in cost on the great bulk of mail which can be facilitated by aerial post.

At first glance the new rate would appear to be appreciably higher than the former schedule, but in reality it is lower, whereas the old tariff was on a full ounce. Study of the new rate, however, shows that the rate is actually cheaper, according to officials of Western Air Express.

**BUREAU TO GO EAST**

In the first place they point out, 10 per cent of the air mail is to Chicago and other mid-western cities, so the present schedule is the rate from 20 cents to 30 cents per mile, the blanket rate, a rate which is higher than one-half cent per mile, and less than 10 cents by air mail to any city. Furthermore, it is difficult to meet the Post Office Department's demand for first-class letter mail delivery units to the pound. At the average letter weight, 10 cents per ounce, so that the great majority of letters come within the half-cent limit and can be delivered to any point for 10 cents, under the new universal rate, instead of the one-and-one-half cent for an air-mail letter, the cost for an air-mail letter being high as for a full ounce.

Two points west of Cheyenne, the center, will be higher than the new rate. To such points as Denver, 10 cents per cent of Southern California air mail is flown and of the great bulk in the average, the cost will be the same as in the main, but the savings on letter air mail to eastern points will more than offset this.

**GUIDE ON MAILING**

In a guide to mailers generally, it

GARMENT HARKS  
BACK TO ANCIENTSINDIAN ART  
GOODS TO BE  
ON DISPLAY

Textiles by Guatemalans  
Reproduce, Designs Made  
Two Thousand Years Ago

A collection of textiles, garments and masks reproduced by the hands of Indians in the same manner as did their forbears 2000 or more years ago will be placed on exhibition at the Biltmore tomorrow under the auspices of the Foreign Trade Club of Southern California.

The exhibit, which consists mainly of textiles, was collected by Don Rader, Yerba Buena, originally

an authority on Indian art, during a six-month tour among the Maya-Guiche, one of the chief Indian tribes of Guatemala. Each piece in the collection is an exact reproduction to the mystic designs and symbols of the tribe, of similar pieces fashioned by the ancestors of the Maya-Guiche back in the past.

The collection brought here by Harry A. Stanley of Guatemala City, and American in the service of the Guatemalan government. The most striking thing about the collection is the freedom from white influence. They are exactly as they would have been 1000 years before the discovery of America.

Mr. Rader, as the prince, Duke of Guatimala, and other members of the delegation, will be in the shadow of death: Max Reinhardt as the mad emperor, King Alfonso, the Cardinals, and Presidents.

It should be emphasized here the actors, but the spectacle is to be seen in the most inaccessible regions, where contact with the white population is infrequent. Consequently they have maintained their ancient culture to an astonishing degree.

OIL INDUSTRY IN  
NEW HIGH MARK

Returns \$25,000,000 More

Than Last State Record

California Agriculture in  
Second Position

Los Angeles Has 34 Per Cent  
of Building Activity

Mining, which includes oil produc-

tion, continued to lead California's

leading industry during 1926, accord-

ing to a survey just completed by the California Development Asso-

ciation. The value of the minerals

taken from the ground for the year

was \$154,400,000,

a new record, eclipsing the previous

high mark of \$122,000,000,

a gain of about 8 per cent. Of this

production about 77 per cent was

produced in Los Angeles.

Oil accounted for \$85,000,000

of the total and cement, which stood

second, for \$27,000,000, according

to the survey.

Other mineral products appear in

the following order: Crushed rock

and gravel, natural gas, gold

and hollow tile, copper, salines, bor-

axite, potash, lime, silver, zinc,

lead, manganese, quicksilver, mica,

gold, production, the survey said.

PAST TENSE  
Many an alibi is more truthfully an alibi.

HAIR CUT AND SHAVE  
Now that the girls have to have their hair cut every week or so a lot of them also have to shave expenses in other ways.

MULLED BEER  
A champion lady bowler is Mary Wambier, which should give alling ones something to mull over.

THE MAD MAN  
Seems that a man can only do about so much good, but when it comes to going naughty the lid goes through the roof.

DROWNED  
We really ought to quit calling a dollar a "buck." A dollar won't buy enough nowadays to be comparable to anything else.

THERE ARE OTHERS  
Out this way every man thinks he knows what it means when the papers or the stores speak about the dam bill, but he doesn't know half of it.

BLIND MARSHMEN  
Hayward Thompson shoots while blindfolded. Look out for that chap. Cupid is said to do the same and look at all the trouble he makes.

A IN BOSTON  
If the Chinese have an eye to historic precedents and really want to get the goat of the English over there, they will begin with a tea party.

PANTS DECRIES  
American women long have been guided by Paris fashion decrees, but it's coming a bit strong when they ask their husbands to abide by Paris divorce decrees.

HAPPY RESULT  
Still another pleasant result of the big swim in January has been the silencing of the chap who was inclined to be boastful because he took a cold bath every winter morning.

UNPARALLELED  
The Estrada army made one outstanding record. It has been better fed and housed than any other Mexican rebel army in years and is the only one in history which ever lasted for months in captivity.

EVOLUTION  
If it took evolution so many centuries to make a man out of a monkey, how is it that most any little ninety-eight-pound fawner can make a monkey out of a man in half an hour?

ENT ASUNDER  
The head of the Progressive Political League promised that if Al Smith is nominated there will be an independent Democratic ticket in the field. But what has this league to do with shaping the destinies of Democracy?

THUMBS DOWN  
Nobody seems to care very much what happens to a wrestler when he is working at his trade. He may get caught in a scissor or tossed into the milling crowd without drawing a note of sympathy from the spectators. He is supposed to be a tough guy.

AN ANCIENT MACHINER  
A Kansas farmer at the age of 92 is daily doing sole driving with a vicious Ford and rather likes it. He thought the machine was foolish and dangerous when he was 25, but at that time the grand passion came to him. Maybe that is what they call second childhood in Kansas.

MOTORFETTER  
In the United States there is a motor for every family of six; in Great Britain, one for every 55 persons; in France, about the same ratio as in England; in Germany, one for every 123; Japan, one for every 1800; Russia, one for every 7500; China, one for every 31,000. The motor appears to be a fair thermometer of civilization.

ENLIGHTENING INDIA  
India has untold resources in water power. She has started construction on a dam 144 feet high on the Pykara River and will impound 4,000,000 cubic feet of water. It will produce 116,000,000 kilowatts a year. This may help to enlighten India and prove one of the best missionaries.

TAKE THINGS EASY  
A Yale professor advises everybody to take a few moments of relaxation every hour or so. One does not have to be a Yale professor to get an audience for this idea. There is a feeling that the idea has been popular for some time and that the business world is filled with workers who are taking their relaxation regularly. The professor's idea is that an occasional minute of complete relaxation will perceptively add to bodily and mental efficiency and prolong life. Most folk are ripe and ready to try it.

EUROPEAN AUTOCRACIES  
Representative government in Europe and Asia seems to be yielding temporarily to military dictatorships. Peoples who have won their freedom appear to be incapable of self-government. They are unable to find a middle ground between tyranny and license. Representative government is as near perfect in form for the regulation of the political life of peoples as any political institution yet devised; but it is apparently not foolproof. It might be likened to an automobile, capable of perfect performance in the hands of an experienced chauffeur, but dangerous when conducted by an inexperienced driver.

Lithuania is the latest state to surrender its independence, to pass under the rule of a military dictator. Lithuania in Lithuania has followed the lead of Poland. He seized the government last week at the head of the army, and the members of the Lithuanian Parliament, elected by the people, were sent about their business. He has been known as a Lithuanian patriot. He had much to do with securing his country's independence; but he became disgusted with the weak and vacillating policy of the government. His excuse for establishing a dictatorship with himself at its head was that it was necessary to check the Bolshevik influence seeping across the border from Russia.

Nearly half the area of Europe and Asia is now under the control of military dictators. Half the populations of the two continents are deprived of the right of suffrage. They pay taxes for the support of governments not of their own choosing.

To us of this country such a condition would be unthinkable. We may have an occasional bad Congress and a bad Legislature; but they are of our own choosing. It is something we inflict on ourselves, and the term of their misgovernment is always in sight. But such is not the state of mind of the European and Asiatic peoples. No people now under the rule of a military dictator has enjoyed for more than a brief period representative government under republican institutions.

Russia is ruled by a military dictatorship, although the form has been modified since Stalin succeeded to power. The Russian people have never had any actual experience with self-government. They are not accustomed, and most of them are not inclined, to mingle in affairs of state. They are content to pay taxes and not be held responsible. The same is true of China, which has never been a republic except in form. Poland consists mainly of former Russian territory, and the people are born and raised to despotic rule. Spain and Italy are ruled by de facto dictators, but the governments are monarchical in form and puppet kings still occupy the thrones. Lithuania was formerly Russian territory, and the people are not sufficiently educated to run a republic under representative forms.

Taking the wider view, it becomes apparent that the dictatorships are only temporary. They mark a passing from autocracy to democracy. The peoples have yet to learn the fundamentals of representative government. A generation will probably pass before they will be able to put their mass strength to good purpose.

Germany, on the other hand, is progressing under representative government. The people were sufficiently educated to adapt themselves quickly to republican institutions.

The monarchist spirit is rapidly passing. Only last week the Monarchist party formally renounced all hope of a restoration of monarchical forms and entered a coalition to consolidate the republic.

Faith and education are necessary to make the populations of Europe and Asia self-governing. Some of them will serve as apprenticeships, or perhaps a generation, but, despite the dictatorships, the representative idea is steadily gaining ground.

WHO IS THE HUMBUG?  
And now William E. Gladstone is under fire. Capt. Peter E. Wright, British iconoclast, charges "The Grand Old Man" with being a hypocrite in matters of morality. "Arch humbug" is the slur employed.

When the 75-year-old son of the Elder Gladstones attempted to defend his father and called the defamer a "liar, coward and fool" suit was at once entered. It may be difficult to ask, who is the humbug?

Nobody appears to be safe anymore. Even the coffin is not sufficient armor. Honor is no protection. The loftiest patriotic service is chosen as the best target. Virtue arouses all the furies of perdition.

As usual a Briton is at it. Just what the peculiar complex may be that impels anyone to stir up the sensations, true or false, and bring into disrepute the ideals of the past is beyond the power of conception.

Whether it actually takes a thief to catch a thief, or the immoral normally apprehends the communications of the vicious, or whether common misery just loves company, it may be difficult to state.

A number of Englishmen have been employing their time lately in looking up the weaknesses of Americans. He is too busy hunting through mountains and putting the swaddling bands on continents. He is so taken up with his progeny that he has little time to bother about his ancestry. He is trying to switch on the light into the future. He is making big eyes for the earth to find other universes. He is strapping wings upon his imagination. He is strapping atoms that they may become his slaves.

Must and dust have never offered much appeal to him. When he finds he must immediately sets about to invent a formula to destroy it. He is so anxious to make the future better, that he has little inclination to make the past any worse.

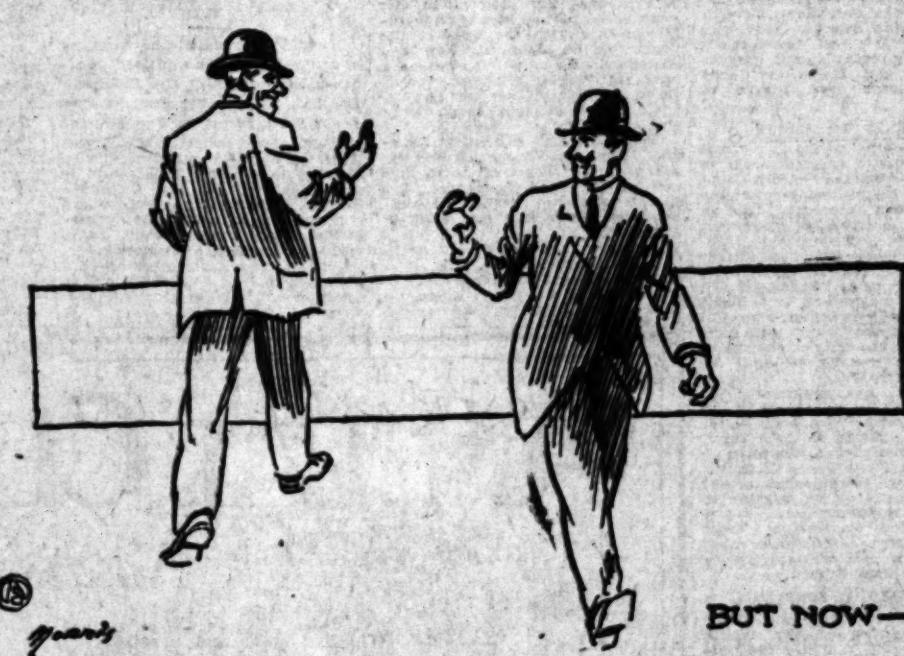

Furthermore, he has never been impressed that it takes much of a heroic spirit to wait until a man is dead half a century or more to stick the stiletto of slander into him. Stabbing a man in the back has never been held in the highest esteem in California. Even a California ratter gives notice before it strikes.

However, the world will not be greatly

## When Will Nations Trust Each Other?

MEN ONCE WENT ARMED FEARING EACH OTHER

BUT NOW—

(Painted by George Matthew Adams.)

PERTURBED. It will take more than a few puny punks choking on silk to throw it off its balance. When the snapping, snarling fraternity have all been swept up like refuse by the big broom of the ages William Ewart Gladstone and George Washington will be carrying on. Together these worthies are in mighty good company.

great a luster as those of Newton and Galileo. But even if the theory is not proved the discovery remains one of the most important ones of the twentieth century.

PRIMES THE FLAPPER

A British writer praises the American dapper to the skies because of her beauty and cleverness. To this she adds the belief that many of the smartest-looking American girls have been brought up to do the housework and most of them can cook a good meal or make their own dresses. It is hoped that this genial observer has not overshot the mark, but there are a great many folks right here on the ground who are not stuck on the flapper's cooking. They are also a bit dubious about her qualifications in plain and fancy sewing. She knows how to wear a dress but not often how to make one.

NEW THEORY OF LIFE  
Ever since the announcement of the discovery by Dr. Robert A. Millikan of cosmic rays one hundred times as powerful as the X-rays physicists the world over have been speculating upon their nature and their adaptability to scientific uses. Among the most interesting theories that have been evolved in regard to these rays, which come from outer space and are constantly falling in prodigious numbers and enormous forces upon our planet, is that of Dr. Michael L. Pupin, professor of electro-magnetism of Columbia University, who has made an independent study of these mysterious radial manifestations and has arrived at the conclusion that they are of vast importance to life, as it is by their continual arrival from space that animal existence is maintained.

Dr. Millikan never has set up the claim that life is kept going on this earth by this great newly discovered force, and it is doubtful, indeed, if he ever will do so, for great gaping holes are to be seen in the Pupin theory—holes through which a motor bus, if not the coach-and-four of the old-time phrase, might be driven—and some of the eastern critics are ridiculing it.

DR. MILLIKAN NEVER HAS SET UP THE CLAIM THAT LIFE IS KEPT GOING ON THIS EARTH BY THIS GREAT NEWLY DISCOVERED FORCE, AND IT IS DOUBTFUL, indeed, if he ever will do so, for great gaping holes are to be seen in the Pupin theory—holes through which a motor bus, if not the coach-and-four of the old-time phrase, might be driven—and some of the eastern critics are ridiculing it.

## NO DISPUTE

I bought a pound of Colgate from Johnson Chipp, the advertising king: I rooted for the G.O.P. while he was fusing with a string. "The Great Old Party," I exclaimed, "is always strong for truth and right and any man should be ashamed to disown it." It is true and right. His wife is a Senator on his side, and Johnson Chipp is a good boy, and I would be the first to say upon a rope to swing him down. I'd heard that Johnson would go with anything a man might suggest so, he sold his jewel of the jug of juice, his halo of hair. He had no principles, men and women, and no convictions warmed his breast; to my eyes he had how he stood. So on the morrow I appeared before him more and said, "Well, we're quits. It's to be greatly feared that they'll always be a few Jesus. We need a starting point and we should were all off to the Grand Old Party has gone off from feeding at the public trough." "I'd be the first to face my gate," said Chipp, "to play the G.O.P.; we need deserving Democrats—what will you have, the pounds of tea?" It was my joy to find how many people had indeed, and freely given up my mind, until it was given over to reason. But when I noted the smile he wore and the look he tried to please, I vowed thereafter in this store I'll buy my bread and honest cheese. I did it good to blow my cash with one who dares to peace aspire, will switch opinions in a flash before he'll rouse my sleeping ire. The famous statesman when he thinks not think along a rigid line; but who deals in kickless drama is wise, adopting thoughts of men. Military boosts his trade also, who always says that I am right and never hints that I am wrong.

## PENNY DREADFULS

## SOUGHT IN ENGLAND

Quite as in the United States where today the old-time dress now being bought by dairymen, florists and others at chain stores, there exists a lively demand among the London dealers for copies of the formerly outlawed "penny dreadfuls." The current catalogues of a well-known house give some idea of the variety of titles to be found described as "probably the most popular of penny dreadfuls which when issued in one book." And in the same issue, W. G. Barwick, owner of the Croydon Public Library, describes the invention of a new class of books on which the author of the "penny dreadfuls" has based his borrowings of all sorts of material from the classics of literature.

"The penny dreadfuls have given us," the author continues, "a new form of entertainment and give a warning to those who are more obviously a victim while virtue always triumphs in the end." The author of the book, Mr. John Newland, wrote his masterly preface. "There is no penny dreadful in the world so terrible as the one we have been compelled to write the greatest of the penny dreadfuls, the immortal 'The Queen of Hearts'."

A Freeman of London

What does it mean to be a Freeman of the City of London? It means to be a member of the city and its government on three continents. Mr. Weston, New Zealand; Mr. Hart, South Africa, and Mr. Rose, Newfoundland. The men who are now the members of the City of London have been made Freemen of the City of Britain. The new Freemen is bestowed only on the emperors of the Empire.

The new Freemen are in a gold coat and white shirt. Not there have been admitted a Freeman to be no more than a master. He will be entitled to have children behind him in the Chamberlain's underwriting the election of the little town and administrative powers until they are 20 or 25 years old.

Answers.

Dreadful Measures

An old fellow, crossing the Atlantic, was leaning over the rail when the information hand tapped him on the shoulder.

"Sir," he said, with a wave of the hand, "do you know that if the men were to get the sea would be dry?"

The old fellow looked mystified.

"Well," he replied, "if you see anyone flattening out the ocean, shoot him on the spot."

He swam.—Tut-tut.

Result of Marriage

# NEWS OF SOUTHERN COUNTIES

## FILM MAN BUYS LARGE ACREAGE

*Victor Fleming Purchases Meadowlark Ranch*

*Plans to Turn the Place Into Spanish Hacienda*

*Reported Transaction Cost Him \$250,000*

ENCINITAS, Jan. 30.—Development here of a new estate that will cost more than \$250,000 will be started immediately, it was learned, today following announcement that the 100-acre ranch consisting of 1100 acres, has been purchased by Victor Fleming, motion-picture director of Hollywood. The ranch is approximately three-quarters of a mile north of the town.

Fleming, in making his purchase, followed the lead laid down by Douglas Fairbanks and Mary Pickford in purchasing holdings at Ranch Santa Barbara, where they have turned the Fairbanks' Fleming plans to turn the place into a hacienda with Spanish atmosphere reminiscent of the days before California came under the American flag.

The first improvement work to be done on the Fleming property probably will be the sinking of wells, and construction of a huge dam to wall a scenic lake of more than 100 acres. Water from this lake also will be used for irrigation purposes as well as domestic use.

The place already has several well-constructed ranch houses, all of which will be improved. The present ranch house is of adobe, the age of which it is impossible to determine.

This section Fleming plans to convert into a Spanish hacienda, retaining its original flavor of Old Mexico.

Fleming's new holdings not only will be a ranch, but a playground upon which he can pursue his leisure hours. His director's chair is well known for his aviation activities and is planning to convert eighty acres of the property into a landing field for airplanes. A barn 40x60 feet will be made into a hangar for the airplanes.

The property was purchased by Fleming from Charles Victor Hall after the director had traveled far and wide and finally decided that San Diego county offered the most ideal location for a permanent home. Negotiations were handled by Sterling Hebbard of Santa Monica, as personal representative of Fleming and Edward A. Shipy of Encinitas.

## Garbage Can Toss Taken East to Jail

SANTA ANA, Jan. 30.—K. G. Gamwell, 26 years of age, who on January 1 threw a garbage can at Peter Bray, county jailor, and then by running down an alley and who later was captured and returned to his cell left Santa Ana yesterday afternoon in custody of Sheriff J. D. Tracy of Anaheim, Orange county, Arkansas. The prisoner is wanted in the southern State to stand trial on a charge of obtaining money under false pretenses. Gamwell originally was arrested in Huntington Beach on December 26 on charge of reckless driving. He was given sentence of 200 days, with an additional of paying a fine of \$250.

After being held in jail for several days he escaped after a garbage can-throwing episode and was arrested two weeks ago in Santa Paula, where he was found by Seal Beach police.

On his return to the County Jail, a warrant was received from Arkansas, together with a telegram asking that the man be held for Arkansas authorities. Because of charge in Arkansas was said to be of more importance than the one Gamwell was being held here on, it was agreed to return him to Arkansas.

## PLAN BUS LINE TO COVER VALLEY AREA

LANKERSHIRE, Jan. 30.—Owens of the Hollywood-Burbank stage line will hold a public meeting early next week with the Van Nuys Chamber of Commerce for the purpose of discussing plans for a passenger motor-bus line to extend from Burbank through Lankershire, Glendale, and the valley and then continuing on to the eastern end of San Fernando Valley. Tentative plans, it is understood, call for a route along Victory Boulevard as far as Burbank, then turning west through the Weeks' Poultry Colony section to Canoga Avenue and thence north to Chatsworth. Before this plan is carried out, it is understood that the proposed bus line might also run through Zelzah and Oxnard. A stage line of the sort proposed will be welcomed by all valley residents as it will give a direct line of travel from the valley into Burbank and Glendale sections. At present there are no rail or bus connections between the center of the valley and the two sections above named.

## YES, GLENDALE HAS NICE, RIPE BANANAS

GLENDALE, Jan. 30.—The lack of bananas has come to trouble Glendale since the last year, but the yellow fruit so celebrated by Tin Pan Alley, can be grown here. Antonio J. Ortiz, 546 North Kenwood street, has had bunches of ripe bananas, and if the frost had not come along and nipped the rest of the growing fruit, he would have had more. He has placed the bunch of dried bananas in his front porch. The secretaries have forwarded to the members of all clubs letters, advising of the program and requesting the club and its representatives to hold a "tree-planting picnic" to be held on the date named. Stanley said that if men responded in sufficient numbers the work could be done in two hours. He pointed out that the picnic for the workers to plant the trees would be held about 9 o'clock and complete the work before noon, with a basket picnic dinner following.

"The afternoon will be devoted to the planting of trees," he said.

"The work will be done by volunteers, and the trees will be provided by the Los Angeles County Nursery.

The secretaries have invited the

people of the city and

the time Congress gets around to granting the appropriation, be growing on a commercial scale.

Silver Peak Guest Ranch, Walnut, Cal., is now receiving guests. For reservations phone Pomona Suburban 5-1222.

## PACIFIC ELECTRIC WINS

*New Trials for \$10,000 Damages in Orange County Court Denied by Judge Marks*

SANTA ANA, Jan. 30.—Superior Judge E. J. Marks denied a motion for a new trial of the four damage suits aggregating more than \$10,000 brought against the Pacific Electric Railway Company and Mr. and Mrs. Otis Richards of Santa Ana by Charles Ring, Jr., the Misses Marjorie and Allene Haines and Mr. and Mrs. W. A. Bloomer.

The damage suits were based upon the death of Miss Willa Bloomer, 17, and injuries received by the Misses Haines and Charles Ring, Jr., in a crossing accident on West Seventeenth street, Santa Ana in 1925.

The cases were consolidated for trial, the jury returning a verdict in favor of the plaintiffs. Attorney George K. Scovell, representing the plaintiffs, argued for a new trial yesterday, being opposed by Attorneys Eugene Morris and Stanley Reinhard, representing the Pacific Electric Railway Company, and by F. C. Drummond, representing Mr. and Mrs. Richards. Glenn Richards, 19, son of Mr. and Mrs. Otis Richards, was driver of an automobile in which the young couple was riding at the time of the wreck. Young Richards was

employed by the Motor Transit Stage Company to secure a new trial of a damage suit brought by Mrs. Verna Bowman, who was awarded \$10,125 by a jury in Superior Court, failed when Superior Judge E. J. Marks denied the new trial motion.

Mrs. Bowman was injured when a car driven by her husband, Fred Bowman, was struck by a stage in the intersection of West Seventeenth and Spring streets, Santa Ana, on Dec. 10.

The stage already has several well-constructed ranch houses, all of which will be improved. The present ranch house is of adobe, the age of which it is impossible to determine. This section Fleming plans to convert into a Spanish hacienda, retaining its original flavor of Old Mexico.

Fleming's new holdings not only will be a ranch, but a playground upon which he can pursue his leisure hours. His director's chair is well known for his aviation activities and is planning to convert eighty acres of the property into a landing field for airplanes. A barn 40x60 feet will be made into a hangar for the airplanes.

The property was purchased by Fleming from Charles Victor Hall after the director had traveled far and wide and finally decided that San Diego county offered the most ideal location for a permanent home. Negotiations were handled by Sterling Hebbard of Santa Monica, as personal representative of Fleming and Edward A. Shipy of Encinitas.

## Tia Juana Now Has Chamber of Commerce

SAN DIEGO, Jan. 30.—Following the receipt of the authorizations of the Federal executive department of the United States of Mexico, an announcement was made that the Tia Juana Chamber of Commerce has been officially organized and is now functioning with all the privileges granted to chambers of commerce under the Mexican law.

The organization of this body is located in one of the most important steps taken on the border in recent years, and the institution, it is announced, has won the support of the business leaders in the Tia Juana district.

The officers of the new chamber of commerce are as follows: Mariano Escobedo, president; M. P. Barrachina, vice-president; G. G. Gonzales, treasurer; Luis A. Marin, secretary; Moul M. Lacarra, assistant secretary; Directors: H. L. Jaffe and Mariano Escobedo. The other officers and presidents of the chamber are Enrique Aldrete, E. P. Baker, James W. Croftord, Mario Cardinalli, Louis Grandi, William G. Johnson, M. P. Escobedo and Juan R. Ordóñez are advancing attorneys of the new organization.

## RANCHERS TO PLANT BIG POTATO ACREAGE

VAN NUYS, Jan. 30.—It is learned here today that ranchers in San Fernando Valley are getting ready to plant between 6000 and 7000 acres in white potato seed this month in March.

John W. Cowles, 5 years of age, was said today by Pasadena volunteers to have had a fighting chance for recovery, following an operation, the boy said to be the son of Mrs. John Cowles, 20, of Colorado avenue, South Pasadena, fell down the cliff yesterday while on a hiking trip in the mountains with members of his Sunday-school class. First reports were to the effect that his injuries would prove fatal.

## DISTRICT PUT UNDER RABIES QUARANTINE

HELMET, Jan. 30.—A quarantine against rabies has been placed in the Hemet-San Jacinto Valley by State and county health authorities following the finding of six positive cases of rabies among dogs.

The quarantine district extends over a radius of ten miles from the center of the city of Hemet, and within that territory no dogs under six months of age may be permitted to be at large. It is expected that this precaution against the spread of rabies will be in effect for at least six months.

## VALLEY AUTO SHOW TO START TUESDAY

LANKERSHIRE, Jan. 30.—The first annual automobile show will open here Tuesday night with more all of the valley dealers maintaining booths. The show will be held in the Lankershire High school and will be continued through the week until Saturday night. One of the features of the exhibit will be a display of some of the earliest cars in the valley with the exception of the desert area of Lankershire was a desert country.

## PASADENA FREIGHT RATE ON STEEL CUT

PASADENA, Jan. 30.—Further reductions in freight rates on iron and steel products shipped from Los Angeles Harbor to Pasadena by the Southern California Chamber of Commerce. In the last year, the chamber has induced the railroads to reduce their freight rates to such an extent that the time of the set-to, and his face was cut out. Wenham was released on \$500 bail.

## DINNER OFFER FAILS TO PLACATE ACCUSER

ALHAMBRA, Jan. 30.—An offer of a "big feed" failed to square matters between Eddie Burton and Herman Wenham after the latter had followed up his offer with his wife following an argument. Wenham made his offer to Burton at the police station, where he was held on a charge of assault. The loser in the encounter didn't return the idea, however, and then trying to smooth things over by offering to buy him a dinner. So Eddie wants to press the charge, particularly as he was wearing glasses at the time of the set-to, and his face was cut out. Wenham was released on \$500 bail.

## MOVE TO REFOREST PEAKS

*Proposed to Plant Thousands of Coulter Pines in Burned Area of Santa Ana Mountains*

SANTA ANA, Jan. 30.—Initiating a movement that may result ultimately in the planting of thousands of Coulter pine trees in the area in the Santa Ana Mountains burned over by the forest fires in November, A. M. Stanley, secretary of the Orange County Farm Bureau, has issued an appeal to the members of service clubs of the county to join in the planting on Saturday, February 6, of 10,000 pine trees on government land in Modjeska Canyon.

The secretary has forwarded to the secretaries of all clubs letters, advising of the program and requesting the club and its representatives to hold a "tree-planting picnic" to be held on the date named.

Stanley said that if men responded in sufficient numbers the work could be done in two hours.

He pointed out that the work for the tree-planting picnic is completed for now.

The afternoon will be devoted to the planting of trees, he said.

"The work will be done by volunteer workers, and the trees will be provided by the Los Angeles County Nursery.

The secretaries have invited the

members of the Tustin and Villa Park agricultural bureaus to help in the work.

Stanley said that the trees would be planted by volunteer workers.

He said that the trees would be procured from the Los Angeles County Nursery.

## COWS MONEY LACKING IN SALARY RISE

Only Testing Calf  
Pasadena Firemen Receive Same Size Checks

Increase Authorized in V. Last November

No Provision Made to Re-Cash for Purpose

PASADENA, Jan. 30.—When firemen cash their January checks Tuesday, they will receive the same amount that was paid them previous month, despite the fact that last November the Pasadena voted by a large majority to increase the salary of the man by approximately \$50 a month, the increase to go into effect at the first of this year.

The City Controllers' office now says the salary warrants for the past month still prevail, the will of the people notwithstanding. No provision for increased salaries is available.

This unique situation arises from the fact that the city runs from June to June. When no provision is made for extra expense in the budget, it is according to the expense of the previous month.

Now four of the six fire directors refuse to allow members to take away from another who may pay the firemen less money which has already been taken from the treasury from the sale of city-owned property. The others take the stand that either no courses would be given or the payment of funds. The Directors voted otherwise. It is now loopholes remain. It is possible to apply the additional funds obtained at a later date to those who will be given a raise. This sort is expected to be decided by the Directors at their regular meeting Tuesday.

## ROSEMEAD REJECTS SCHOOL BOND ISSUE

ROSEMEAD, Jan. 30.—Voters of Rosemead school district rejected a bond issue of \$50,000 at a election yesterday, the count 128 for and 132 against the measure. The majority was in favor of building additions to present Rosemead grammar and installing a number of movements. A very light vote was given, 800 being eligible. The bond issue was to be used for the construction of new schools and colors and emblem.

## To Married Men:

How often have you pondered on the instance of OWNING a home? Instinct and logic—either one—tells you it's the to do.

Married men would own homes if they knew how really easy it is to go about doing one. In the real estate columns of THE WANT ADS you'll find attractive lots for sale, and homesites in pleasant neighborhoods, if you prefer to build your own.

Look at today's offerings. Note the easy—the willingness to meet you half way—and perhaps your wish may be granted much sooner than you had anticipated.

The City Controllers' office now says the salary warrants for the past month still prevail, the will of the people notwithstanding. No provision for increased salaries is available.

This unique situation arises from the fact that the city runs from June to June. When no provision is made for extra expense in the budget, it is according to the expense of the previous month.

## COMMERCE SHOW WILL OPEN HERE

National Business Exhibit to Be Transferred From East for Display in March

Designed to import information on the conduct of an office and to make commercial transactions swifter, surer and less laborious, the national business show, according to announcement yesterday, once more will be held in Los Angeles.

To give time to add numerous innovations in office equipment which have been developed since the business exposition of last October at Madison Square Garden, New York, the dates have been set for April 21 to 25 in the Ambassador Auditorium. Los Angeles' proprietors for the event established in the Ambassador, says virtually everything on display at Madison Square Garden has transferred here together with the later devices, systems and methods.

Los Angeles will be the only city in the West to hold the business exposition according to the schedule, and there will be but two other similar efficiency shows held in the United States this year. The last exposition was held two years ago and this city has put the show's schedule every other year for the last six years.

A feature of the show is said to be the participation of more than 200 office efficiency men, inventors and others identified with the national output of business appliances.

The majority of these are planning to travel here from the East Ge. aboard specially reserved cars, at conclusion of the annual convention of the National Association of Office Appliance Manufacturers, which will be in session there shortly before the Los Angeles show opens.

In keeping with its policies of presenting new products to all the trade, and the affair will be strictly invitational. The plan of the show's sponsors is to invite all officers, executives and workers in the southern portion of California.

Frank Tupper, president of the National Business Show Association, will arrive here early in March to take charge of the exposition, which in the meantime are being held b. Waldo T. Tupper, Los Angeles exposition man.

## TAXI DRIVER BEATS OFF ASSAILANT

**Police Hunt Bandit Who Resembles Officer's Slayer, in Attempted Hold-up**

Squads of detectives were hurried out last night in search of a bandit who made an unsuccessful attempt to hold up Joseph Peterson, a taxi-cab driver, at Pasadena avenue and Avenue Thirty-eight, but fled after a brief struggle with his assailant.

The bandit, police were informed, resembles the gunman who shot and killed Police Officer Bennett last Tuesday in the hold-up of a milliner shop at 756 South Los Angeles Street.

Peterson, who lives at 1945 South Catalina avenue, told police that the assailant, who was wearing a mask and broadsword and instructed him to drive to Pasadena avenue. Near the intersection of Pasadena and Avenue Thirty-eight, the bandit ordered Peterson to stop, whereupon he then covered him with a revolver. But Peterson showed fight and in the struggle which followed, the bandit fired, creating the taxi driver's bullet wound.

When a Dollar Line bus President Lincoln calls this afternoon, officials of the company will serve a buffet luncheon for visitors, and in memory of the bandit, a minute's silence will be observed.

Captain Dolar will handle the wheel of the big ship, while Chairman of Commerce officials will cast off the line.

The ship will be open for reception from 11:30 this morning, and the hour of departure has been set for 3:30 o'clock this afternoon.

## TANKERS CONDITIONED

### FOR NAVY IN OCEAN

Rumors that pawn brokers have gained possession of numerous war veterans' bonus certificates and are endeavoring to cash them by the forgery of the names of the original owners is under investigation by the United States Secret Service. W. W. Ashe, agent in charge here, declared last night.

Information brought to the Federal authorities, Ashe said, was to the effect that veterans needing money had sought loans upon them and that subsequently the pawn brokers had refused to return them to the men. In one instance, it was charged by the Federal agent, the brokers had forged the names of the soldiers and sought to borrow sums from banks by sending "paper money" to represent the rightful owner.

Ashe declared that the pawning of certificates was in itself a illegal transaction, punishable by a misdemeanor, and that the names, as asserted, would constitute a felony.

**MAIL EXTENSION COMPLETE**

VERNON, Jan. 30.—Work has been completed on the installation of the Los Angeles Street Railway Company's extension on Leontine Avenue, between Pacific Boulevard and Downey. This includes the Manufacturing District, and street cars are expected to be operated over this extension beginning tomorrow. The "L" cars will be continued down the extension, these cars are planned to stop at Santa Fe and Vernon avenues.

Mr. Nellie W. Brown of Cleveland, O., averaged 28 per cent in the State examinations for the limited practice of medicine and surgery.

## LEGAL NOTICES

**STOCKHOLDERS MEETING**

It is hereby given that the Annual Meeting of Stockholders of the Los Angeles Street Railway Company will be held at 10 a.m. at the office of the Company, 149 North Orange Avenue, Los Angeles, Calif. on Tuesday, February 6, 1927, at the same place, for the purpose of electing a Board of Directors to serve for three years, and to transact such other business as may be presented for their consideration.

KENTON F. LEWIS, President

I WILL not be responsible for any debts that I incur or any debts that my wife incurs while I am left unaided and board. W. H. LOWRY.

## THRONGS VISIT SHIPS AT PORT

### Foreign Trade Week Wakes Southland Interest

### Thousands Ride Vessels to View Harbor Wonders

### Dinner to Capt. Dollar Will Climax Occasion

Foreign Trade Week's stories of the glories of the sea wrought cumulative effect on the harbor yesterday. Literally thousands descended on the port from all over the Southland.

Then warmed the battleships, clattered over the merchant ships, gaped in awe at the windjammer and rode everything down to a roar, so raptly minded were they for the last six years.

The port was in its happiest mood to receive them. Two-score big merchantmen were to drop or load their wares for no fixed convenience, with flags and banners flying, bearing their part in Foreign Trade Week.

The H-10 tax boat fleet transported 1,000 persons to the nation's capital, and many more were to be seen about the harbor, and navy boats hauled as many more. Even the yachting fraternity sensed the gale day and their white sails dotted every part of the bay.

The port was in its happiest mood to receive them. Two-score big merchantmen were to drop or load their wares for no fixed convenience, with flags and banners flying, bearing their part in Foreign Trade Week.
